1 <u>OVERVIEW OF NEMS</u>

The NASA Equipment Management System (NEMS) is a standard Agencywide data processing system designed to track information and activity pertaining to NASA's equipment. The intent of NEMS is to simplify, standardize, and reduce the cost and time of managing and controlling equipment by providing a single NASA system for equipment management.

NASA currently owns or leases about 380,000 items of controlled equipment with a total value in excess of $4.8 billion. The responsibility for managing these items is assigned to ten installations and to NASA Headquarters. Each installation designates a Supply and Equipment Management Officer (SEMO) for the functional administration of supply and equipment management at the installation. Division directors/chiefs are responsible for the equipment assigned to their organizations. Directly supporting the division directors/chiefs are property custodians who keep track of the equipment and monitor the day-to-day activities. Equipment managers interface between the SEMO and the custodians. Equipment managers oversee the operation of NEMS and assist the custodians in the proper procedures. Approximately 25% of NASA's equipment is in the custody of NASA contractors, who are contractually accountable for the equipment to one of the NASA installations or to NASA headquarters.

NEMS is both a distributed and centralized system. The system is distributed in that each installation has a database containing its equipment data, and the actual processing of equipment management transactions is done at the installation. The transactions track data on the movement of equipment in and out of the installation, equipment disposal, equipment maintenance, and equipment inventory. These transactions are entered, edited, and applied online. Batch reports assist in monitoring these activities and in maintaining an accurate and up-to-date database. A NEMS control center directs the operation of NEMS at each installation.

NEMS is centralized in that a common Agencywide database is maintained at a central site. This database is actually a concatenation of each installation's database. The transactions processed at each installation are transferred to the central site and applied to the central database on a nightly basis, placing the central database one evening behind the installations, at the most. Each installation can query this database online for the purpose of screening equipment for redistribution and excessing surplus equipment. The central database is also involved in the transfer of equipment between installations. Batch reports track this data and provide Agencywide statistics and summaries.

NEMS provides NASA Equipment Management with many capabilities designed to speed the handling of information and reduce the cost of managing controlled equipment. These capabilities include:

1. Online updating of the local installation's data base and overnight updating of the central data base to ensure that the data is as up-to-date as possible.

2. Online query and ad hoc report generation capability for both the central and installation's database to provide quick and easy access to more complete equipment information and to permit a reduction in paper requirements.

3. Online NASA-wide screening of the central database to maximize the visibility of equipment available for reutilization.

4. Tracking of items valued at $500 or more to increase the number of items available for reutilization within the agency.

5. Creation of a core group of equipment data elements common to NASA and a basic set of reports to provide standardization throughout the agency.

6. Inclusion of a block of unique, locally assigned equipment data elements to be used by each installation as necessary, and the capability to generate queries and ad hoc reports utilizing this data to meet local requirements, practices, and needs.

7. Implementation of a single NASA-wide, multipurpose form (NEMS or 602) for the custodian. This form is generated by the computer for each controlled item and used to initiate equipment transactions to reduce the workload placed on the custodian, simplify and reduce required actions and record keeping, standardize certain procedures, and replace a variety of forms used by each installation.

8. Automation of the inventory process of one of the most labor intensive and tedious requirements of equipment management. Portable, hand-held terminals (portable bar code readers - PBCR's) with an electronic wand read bar code labels attached to the equipment and containing the NASA equipment control number. Data accumulated in the portable terminal is transmitted to the computer and used to update the installation's database.

These capabilities reduce the need for a variety of forms, procedures, and systems to be used by each NASA installation. They also permit NASA to maintain a standard Agencywide system, while providing each installation with complete control and responsibility over its portion of the data.

As an Agencywide system, NEMS requires standard hardware and software at each installation and at NASA headquarters. The hardware includes an IBM 434 OS/MVS compatible computer, and the software includes ADABAS, a data base management system (DBMS) distributed by Software A.G. The NEMS database is managed by ADABAS, and the programs are written in ADABAS/NATURAL, an interactive programming language. The teleprocessing (TP) monitor may be CICS, CMS, COM-PLETE, or TSO. Once developed, the program support

communications network (PSCN) will link the NASA installations to the central site for online queries and nightly data transfers.

Each NEMS control center contains terminals connected via controllers to the IBM 434 compatible computer, several serial/character printers connected to the terminals for printing online ad hoc requests, one line printer connected to the computer for printing batch reports, and microfilm cameras and readers for microfilming paper transaction documents. The terminals used with NEMS must be IBM 3270 protocol with at least an 80 x 23 line screen size.

Because an objective of NEMS is standardization, any changes in the mode of operation, the operating environment, or interfaces with other software, and any planned changes or improvements must be carefully studied. Those that will affect the installations will be accomplished Agencywide with NASA headquarters acting as the coordinator.

For information on the procedures and guidelines for managing NASA equipment, refer to the NASA Equipment Management Manual (NHB4200.1B) and the NEMS User's Guide for Property Custodians.

2   <u>GETTING INTO THE SYSTEM</u>

The NEMS database is managed by ADABAS, a database management system (DBMS) distributed by Software A. G. The files that comprise the NEMS database are:

1. Equipment File - This file contains information pertaining to Agencywide controlled equipment. There is one record for each item of equipment. The unique key for each record is Agencywide Equipment Control Number (ECN), which is also physically attached to the equipment on a bar code label. This file is updated through the online Equipment File Update.

2. History File - This file contains information on records that have been deleted from the Equipment File. This information can be used to identify prior activity. A record on the History File is an exact duplicate of the record, which was on the Equipment File. Due to the transfers of equipment between Agencywide installations, an item can be added to and deleted from an installation's Equipment File more than once. Therefore, there may be more than one record on the History File for a particular item of equipment. The unique key for each record is Agencywide ECN plus a computer-generated sequence number. The delete transactions automatically add a record to the History File. Periodically, the oldest records on the History File are copied to tape and then purged from the History File.

3. Table File - This file contains information for editing and interpreting the codes used on the Equipment File. Many tables are kept on the Table File, one table for each type of code. The tables are divided into central, installation, and system maintained tables. There is one record on the Table File for each code. The unique key for each record is a table number (i.e. 040 for the manufacturer's code table) plus the code. This file is updated through the online Table File Update.

4. Daily Transaction File - This file contains information on each transaction processed during the day. There is one record for each transaction. The unique key for each record is Agencywide ECN plus a computer-generated entry reference number, which is comprised of the installation number, the Julian date, and a sequence number. Each transaction automatically adds a record to the Daily Transaction File.

5. Monthly Transaction File - This file contains information on each transaction processed during the month. Each night, the records on the daily transaction file are merged with the records on the Monthly Transaction File. The Daily Transaction File is then purged so it will be ready for the next day's processing. Each month, records on the Monthly Transaction File are copied

to tape. The Monthly Transaction File is then purged so it will be ready for the next month's processing.

6. Transfer File - This file contains information on equipment shipped between centers. This information will be used as input for the receiving centers add transaction.

Several system files are also under the NEMS database. These files contain data needed to run batch report and maintenance jobs, and are internally maintained.

The NEMS online system is comprised of five subsystems. A user may have access to all or part of a subsystem, or may not have access to a particular subsystem at all. The USERID assigned by the NEMS database administrator (DBA) or NEMS programmer for access to NEMS controls the user's subsystem authority levels. The five subsystems are:

1. Adhoc Inquiries - This subsystem allows the user to view information stored in the NEMS database via pre-programmed or dynamic adhoc requests.

2. Equipment File Update - This subsystem allows the user to update the Equipment File. Each transaction is edited and applied online.

3. Maintenance - This subsystem allows the DBA or NEMS programmer to update the user authorities and to submit batch jobs that maintain the database. These jobs include backups of the database, data transfer to the central site, merging of the Daily and Monthly Transaction Files, copying of the Monthly Transaction File to tape, copying of the History File to tape, financial management interface, and updating of the database with inventory data.

4. Report Selection - This subsystem allows the user to submit preprogrammed reports for overnight (batch) processing. The reports are produced on hardcopy paper. Reports can be submitted on-request for a one-time-only run or be scheduled to run cyclically (i.e. daily, monthly, annually) without user intervention.

5. Table File Update - This subsystem allows the user to update the installation tables on the Table File. The updates are edited and applied online. The NEMS online system is menu driven with formatted screens. The user enters information that determines which screen will appear next, or enters data necessary to update an equipment record or table record.

```
USER-ID: XXXXX        NASA EQUIPMENT MANAGEMENT SYSTEM        DATE: MM/DD/YY
PROGRAM: MNU001P1              (NEMS)                         TIME: HH:MM:SS
                       MARSHALL SPACE FLIGHT CENTER

                    ENTER FUNCTION OR 'X' TO EXIT: _____

                        1.   ADHOC INQUIRIES

                        2.   EQUIPMENT FILE UPDATE

                        3.   REPORT SELECTION

                        4.   TABLE FILE UPDATE

                        5.   SYSTEM MAINTENANCE
```

PURPOSE:

The NEMS Main Menu displays the subsystems the user is authorized to use.

CALLED FROM SCREEN:

The NEMS driver calls this screen. To invoke the NEMS driver, enter the command 'NEMS' when prompted by 'NEXT' under ADABAS/NATURAL.

CALLS SCREENS:

1. At present there are five subsystems, which the user may invoke. They are:

      a) Adhoc Inquiries

      b) Equipment File Update

      c) Report Selection

      d) Table File Update

      e) System Maintenance

      Upon completion, these subsystems return to the NEMS Main Menu.

2. Upon completion, this screen returns to ADABAS/NATURAL.

INSTRUCTION STEPS:

Step 1: The screen will appear with a list of authorized subsystems. Enter the number corresponding to the subsystem you wish to access or enter 'X' to return control to ADABAS/NATURAL.

Press the 'ENTER' key.

Step 2: If error messages appear at the bottom of the screen, read the messages and correct the identified field.

Press the 'ENTER' key.

This step may be repeated as many times as necessary.

EDIT CRITERIA:

Valid function or 'X'

2.1   NAVIGATION

The NEMS online system is designed as a 'tree' structure. This refers to the method of moving (navigating) from one menu or screen to another. You start at a single point (the NEMS Main Menu) and proceed down a branch to another menu that branches until you are at the desired function. You return from that function back through the menus until you reach the Main Menu, and then take a different branch to perform another function. You only exit the system from the Main Menu.

An alternative method of navigation is the 'direct command'. With this method you are permitted to access a destination one, two, or in some cases, three levels deep in the menu 'tree' with a single command.   The direct command is invoked at the same place navigation is currently controlled: any place you select a menu option, exit from a menu or function, and any place you may cancel from a function. The direct command, when invoked, will take you to that specific function without navigation through the intermediate menus.

The syntax for the direct command is '=a.bbb.ccc' where the equal sign '=' designates the value as a direct command. The first 'tree' level is identified by the 'a'. A delimiter '.' followed by the second level and third level (where applicable) follow. The values for the levels correspond to the values on that level of menu. The first level corresponds to the Main Menu options. The second level corresponds to the specific options available to the option designated by the first level. The same applies to the third level. Simply, think of it as stacking your selections when moving down the menu tree. As an example, the Equipment File Adhoc by ECN is option 3 of the Ad hoc's. The Ad hoc's are option 1 of the Main Menu. If you wish to adhoc an equipment record enter the direct command '=1.3'. To adhoc the User Number Table you may navigate there directly by entering '=1.11.090'; the Ad hoc's are option 1 of the Main Menu, the Table Adhoc Menu is option 9 of the Ad hoc's, Table 090 is option 090 of the Table Ad Hoc Menu. To access an add transaction enter '=2.a'. The options

NEMS Users Guide
Version 6.0
August 2003

available to each user depend upon their USERID profile and may not be the same for everybody. For instance, if you did not have adhoc authority and wanted to access an add transaction your direct command would be '=1.a' since the Equipment Update Transaction Menu would be option 1 of your Main Menu.

The intent of the direct command was to permit short cuts on the navigation through the menus. You are permitted to access any menu for which you are authorized down to the level where a data value (like an ECN) would have to be entered, or where an update could take place. In most cases this is two levels: '=1.4' for Equipment File Adhoc By Field, '=3.3' for Altering Currently Scheduled Reports, '=4.078' for Updating The Custodian Account Number Table, '=2.d' for Selecting A Delete Transaction. In a few cases three levels of navigation are permitted: '=3.2.140' for Scheduling Report 140 To Run On Request, '=1.11.102' for Performing an Ad Hoc on the Building Number Table.

Assuming that you have the authority for Ad hoc's, Equipment File updates, reports and table updates; here are a few examples:

COMMAND	RESULT
=2.a	You will be in the Equipment File Update Menu for add transactions
=4.090	This command will take you to the User Number Table Update Screen
=1.11.040	You will go to the MFG Code Table Adhoc where you will be requested to select an option and a range of values
=3.2.140	You will be taken to the Report 140 Parameter Entry Screen

There are a few special direct commands available:

COMMAND	RESULT
=q	This command will take you out of NEMS. The result is the same as entering 'X' on the Main Menu. You would either exit NATURAL or receive the 'NEXT' prompt in NATURAL. This depends on how your NEMS is set up.
=0	This command will take you to the Main Menu.
=x	This command will take you to the Main Menu and put the 'X' in the input field. If you press 'ENTER'

again the 'X' will be executed.

These commands can be used as a quick return to the Main Menu or out of the system. The direct commands are intended to enhance navigation, not to replace the existing method of climbing up and down the menu 'trees'.

3   <u>AD HOC INQUIRY SUBSYSTEM</u>

In general, 'ad hoc' refers to an online inquiry program that is assembled during the user's session, using criteria selected by the user. The user may select any of the following files for ad hoc inquiries:

1. Daily Transaction File

2. Equipment File

3. History File

4. Monthly Transaction File

5. Yearly Transaction File

6. Table File

7. Transfer File

The Daily Transaction File, Equipment File, History File, Monthly Transaction File and Yearly Transaction File may all be selected by ECN or by field. The Transfer File may be selected by ECN or viewed by Receiving or Sending Installation.

The Daily Transaction File, History File, Monthly Transaction File and Yearly Transaction File may have multiple records per ECN. When this occurs and the tables are being accessed by ECN a second screen is displayed with information that will allow the selection to be narrowed to one record.

Table number is used to access the Table File where most individual tables have predetermined descriptor fields that can be used in selecting records. The user can also use the defaults that will cause the entire table to be listed. This procedure does not apply to those tables that are small enough to fit on one screen. All files are displayed on formatted screens.

3.1   NEMS AD HOC INQUIRIES SUBSYSTEM

NEMS AD HOC INQUIRIES MENU

```
USER-ID: XXXXX              NEMS ADHOC INQUIRIES MENU            DATE: MM/DD/YY
PROGRAM: ADH000P1                                                TIME: HH:MM:SS

                ENTER FUNCTION OR 'X' TO EXIT: _____
                     1.   DAILY TRANSACTION FILE BY ECN
                     2.   DAILY TRANSACTION FILE BY FIELD
                     3.   EQUIPMENT FILE BY ECN
                     4.   EQUIPMENT FILE BY FIELD
                     5.   HISTORY FILE BY ECN
                     6.   HISTORY FILE BY FIELD
                     7.   MONTHLY TRANSACTION FILE BY ECN
                     8.   MONTHLY TRANSACTION FILE BY FIELD
                     9.   YEARLY TRANSACTION FILE BY ECN
                    10.   YEARLY TRANSACTION FILE BY FIELD
                    11.   TABLE FILE BY TABLE NUMBER
                    12.   TRANSFER FILE BY ECN
                    13.   TRANSFER FILE BY RECEIVING INSTALLATION
                    14.   TRANSFER FILE BY SENDING INSTALLATION
                    15.   SUPER NATURAL
```

Purpose:

The NEMS Adhoc Inquiries Menu displays the functions.

Called From Screen:

The NEMS Main Menu calls this screen.

Calls Screen:

1. List Daily Transaction File by ECN

2. List Daily Transaction File by Field

3. List Equipment File by ECN

4. List Equipment File by Field

5. List History File by ECN

6. List History File by Field

7. List Monthly Transaction File by ECN

8. List Monthly Transaction File by Field

9. List Yearly Transaction File by ECN

10. List Yearly Transaction File by Field

11. List Table File by Table Number

12. List Transfer File by ECN

13. List Transfer File by Receiving Installation

14. List Transfer File by Sending Installation

15. SUPER NATURAL

With the exception of Option 15, these screens will return to the Ad hoc Inquiries Menu. Option 15, SUPER NATURAL, will return to the NEMS Welcome Screen.

Instruction Steps:

Step 1: The screen will appear with a list of functions. Enter the number corresponding to the function you wish to perform or 'X' to return to the NEMS Main Menu.

Press the 'ENTER' key.

Step 2: If error messages appear at the bottom of the screen, read the messages and correct the identified field.

Press the 'ENTER' key.

This step may be repeated as many times as necessary.

Step 3: The user may exit the screen at any time prior to successful completion by entering 'X' in the EXIT field.

Press the 'ENTER' key.

Edit Criteria:

Valid function number or 'X'

3.1.1 NEMS DAILY TRANSACTION FILE BY ECN

```
USER-ID: XXXXX                  NEMS                    DATE: MM/DD/YY
PROGRAM: ADH900P1      DAILY TRANSACTION FILE ADHOC BY ECN    TIME: HH:MM:SS

ENTER ECN TO BE DISPLAYED OR 'X' TO EXIT: _____

START AT PAGE (1,2,3): 1
```

Purpose:

This screen prompts for the ECN of the record to be displayed, as well as a page selection option.

Called From Screen:

This screen is called by the NEMS Ad hoc Inquiries Menu

Calls Screen:

This screen calls the Sequence Number Selection Screen or the Daily Transaction Record Display Screen - page 1, 2, or 3 as indicated.

Instruction Steps:

Step 1: Enter the ECN of the record to be displayed. Optionally enter page 2, 3 or accept the default, page 1.

Press the 'ENTER' key.

Step 2: If error messages appear at the bottom of the screen read the messages and correct the identified field.

Press the 'ENTER' key.

Step 3: The user may exit the screen at any time by entering 'X' in the exit field. The user will return to NEMS Ad hoc Inquiries Menu.

Press the 'ENTER' key.

Edit Criteria:

A valid ECN or 'X'

SELECT NEMS DAILY TRANSACTION FILE BY ECN

```
USER-ID: XXXXX                        NEMS                    DATE: MM/DD/YY
PROGRAM: ADH900P1      DAILY TRANSACTION FILE ADHOC BY ECN    TIME: HH:MM:SS
                                   TRANSACTION
  ECN      SEQUENCE NO   TRANS NO     DATE         TIME       ENTRY REF NO
 G080023        1          X90      97/02/03    11:56:39:1     0870340391
 G080023        2          X15      97/02/03    12:04:37:4     0870340393

 

 

 ENTER THE SEQUENCE NUMBER OR 'X' TO EXIT OR ' ' TO CONTINUE: _____
```

Purpose:

This screen lists all the daily transactions for the ECN entered on the ECN Selection Screen. Up to fourteen per page.

Called From Screen:

The ECN Selection Screen calls this screen.

Calls Screen:

This screen calls the NEMS Daily Transaction Record Screen - page 1, 2, or 3 as indicated. Upon completion, control is returned to the ECN selection screen.

Instruction Steps:

Step 1: Select the daily transaction you wish to see. Enter the sequence number, assigned above on the screen, or leave it Blank. When entering a sequence number it does not have to be on the screen being viewed, it need only be a valid sequence number.

Press the 'ENTER' key.

Step 2: If error messages appear at the bottom of the screen read the messages and correct the identified field.

Press the 'ENTER' key.

Step 3: The user may exit the screen at any time prior to successful completion by entering 'X' in the EXIT field.

Press the 'ENTER' key.

Edit Criteria:

A valid sequence number, Blank or 'X'

NEMS DAILY TRANSACTION RECORD - PAGE 1 of 3

PROGRAM: ADH999P1    REPORT DISTRIBUTION INFORMATION         TIME: HH:MM:SS

EFFECTIVE DATE (YY MM DD): __ __ __

INSTALLATION NUMBER: 0808

DISTRIBUTION: NEMS CONTROL_____

MAIL STOP: 4471___

NUMBER OF COPIES: 01

PRINTER DESTINATION CODE: 041_____

REPORT PRINT TYPE - XEROX (X) OR PRINTER (P): P

BINDING INSTRUCTIONS (IF XEROX): _
      G - GLUE BOUND      U - UNBOUND
      S - STAPLED         V - VELOBOUND        ENTER 'C' TO CANCEL: _
```

Purpose:

This screen lists the default report distribution information. The users may modify it, as their needs require. This distribution information will be used for this run only; the default information is unaffected.

Called From Screen:

The NEMS Daily Transaction File Display Selection Screen calls this screen when the "B" (Batch) option is used.

Calls Screen:

Upon completion, this screen calls the NEMS Daily Transaction File Find Selection Menu.

Instruction Steps:

Step 1: The default report distribution information will be displayed on the screen. Change whichever fields do not meet your requirements.

Press the 'ENTER' key.

Step 2: If error messages appear at the bottom of the screen, read the messages and correct the identified field.

Press the 'ENTER' key.

This step may be repeated as many time as necessary.

Step 3: The user may cancel the submission at any time prior to successful completion by entering 'C' in the Cancel field. The user will return to the NEMS Monthly Transaction File Find Selection Screen.

Press the 'ENTER' key.

Edit Criteria:

Effective Date:

Purpose:

This menu lists all the fields available for sort selection up to 3 sorts per record.

Called From Screen:

This screen is called by the where selection screen.

Calls Screen:

This screen calls the NEMS Equipment File Field Selection for Display Screen.

Instruction Steps:

Step 1: Select the descriptor you wish the record to be sorted by up to three fields. If you wish to display summary level information at break of each sort field change the 'N' to a 'Y'.

Press the 'ENTER' key.

Step 2: If error messages appear at the bottom of the screen read the messages and correct the identified field.

Press the 'ENTER' key.

Step 3: The user may exit the screen at any time prior to successful completion by entering 'X' in the Exit field.

Press the 'ENTER' key.

Edit Criteria:

a. Descriptor number must be 01 thru 36

b. Descriptor number must be numeric

c. Break field must be equal to 'n' or 'y'

d. 'X' to exit

```

Purpose:

This screen lists page 1 of 3 pages of fields and prompts to enter the field number for display.

Called From Screen:

The NEMS Equipment File by Field Sort Selection Menu calls this screen.

Calls Screen:

This screen calls the Equipment Record Display Screen or the Display Selection Screen 2.

Instruction Steps:

Step 1: Enter the Field Number of the record to be displayed.

Press the 'ENTER' key.

Step 2: If error messages appear at the bottom of the screen read the messages and correct the identified field.

Press the 'ENTER' key.

Step 3: The user may download the data to the PC by entering 'D', download via Natural Connection by entering 'N' or may run the ad hoc as an overnight report by entering 'B'.

Press the 'ENTER' key.

Step 4: The user may go to any page by entering the page number (1-3) in the Page field or by pressing the PF8 key to move to the next page or pressing PF7 to return to the previous page. The user may exit the screen at any time by entering 'X' in the Descriptor Number field and be returned to the Find Selection Screen.

Press the 'ENTER' key.

Edit Criteria:

a. Display field must be 01 thru 91

b. Display field number must be numeric

c. Must select a minimum of one display field

d. Page may be blank, 1, 2 or 3.

e. 'D' to download the data to the PC

f. 'N' to download via Natural connection

g. 'B' to run as an overnight report

h. 'X' to exit

Purpose:

This screen lists page 1 of 3 pages that prompt for the Descriptor Number, Operator and Search Value for the where clause.

Called From Screen:

This screen is called by the find the selection screen.

Calls Screen:

This screen calls the sort selection screen or the Where Selection Screen page 2.

Instruction Steps:

Step 1: Enter the Descriptor Number, Operator and Search value.

Press the 'ENTER' key.

Step 2: If error messages appear at the bottom of the screen read the messages and correct the identified field.

Press the 'ENTER' key.

Step 3: When all error messages are corrected, a message will appear at the bottom of the screen giving the number of selected records based on the selection criteria. The user may cancel the transaction before attempting a sort by entering a 'C' in the cancel field, or may continue with the ad hoc by pressing the 'ENTER' key.

Step 4: The user may go to any page by entering the page number (1-3) in the Page field or by pressing the PF8 key to move to the next page or pressing PF7 to return to the previous page. The user may exit the screen at any time by entering 'X' in the Exit field and be returned to the Find Selection Screen.

Press the 'ENTER' key.

Edit Criteria:

a. Descriptor must be entered

b. Descriptor number must be 01 thru 77

c. Descriptor number must be numeric

d. Operators must be EQ, GT, LT, NE, GE or LE.

e. Date format must be YYYYMMDD.

f. Page may be blank, 1, 2 or 3.

g. 'X' to exit

3.1.7 NEMS MONTHLY TRANSACTION FILE BY ECN

SELECTION SCREEN

```
USER-ID: XXXXX                      NEMS                   DATE: MM/DD/YY
PROGRAM: ADH960P1    MONTHLY TRANSACTION FILE ADHOC BY ECN   TIME: HH:MM:SS

ENTER ECN TO BE DISPLAYED OR 'X' TO EXIT: _____

START AT PAGE (1,2,3): 1
```

Purpose:

This screen prompts for the ECN of the record to be displayed, as well as a page selection option.

Called From Screen:

This screen is called by the NEMS Ad hoc Inquiries Menu

Calls Screen:

This screen calls the Sequence Number Selection Screen or the Monthly Transaction Record Display Screen – page 1, 2 or 3 as indicated.

Instruction Steps:

Step 1: Enter the ECN of the record to be displayed. Optionally enter page 2, 3 or accept the default, page 1.

Press the 'ENTER' key.

Step 2: If error messages appear at the bottom of the screen read the messages and correct the identified field.

Press the 'ENTER' key.

Step 3: The user may exit the screen at any time by entering 'X' in the exit field. The user will return to NEMS Ad hoc Inquiries Menu.

Press the 'ENTER' key.

Edit Criteria:

A valid ECN or 'X'

SELECT NEMS MONTHLY TRANSACTION FILE BY ECN

```
USER-ID: XXXXX                      NEMS                  DATE: MM/DD/YY

 ENTER THE SEQUENCE NUMBER OR 'X' TO EXIT OR ' ' TO CONTINUE: ___
```

Purpose:

This menu lists all the monthly transactions for the ECN entered on the ECN Selection Screen. Up to fifteen per page.

Called From Screen:

The ECN Selection Screen calls this screen.

Calls Screen:

This screen calls the NEMS Monthly Transaction Record Screen – page 1, 2 or 3 indicated. Upon completion, control is returned to the ECN selection screen.

Instruction Steps:

Step 1: Select the monthly transaction you wish to see. Enter the sequence number, assigned above on the screen, or leave it Blank. Only valid sequence numbers may be entered.

Press the 'ENTER' key.

Step 2: If error messages appear at the bottom of the screen read the messages and correct the identified field.

Press the 'ENTER' key.

Step 3: The user may exit the screen at any time prior to successful completion by entering 'X' in the EXIT field.

Press the 'ENTER' key.

Edit Criteria:

A valid sequence number, Blank or 'X'

Purpose:

This screen lists page 2 of 3 pages of fields and prompts to enter the field number for display.

Called From Screen:

The NEMS Monthly FILE BY Field Sort Selection Menu calls this screen.

Calls Screen:

This screen calls the Monthly Record Display Screen or the Display Selection Screen 3.

Instruction Steps:

Step 1: Enter the Field Number of the record to be displayed.

Press the 'ENTER' key.

Step 2: If error messages appear at the bottom of the screen read the messages and correct the identified field.

Press the 'ENTER' key.

Step 3: The user may download the data to the PC by entering 'D', download via Natural Connection by entering 'N' or may run the ad hoc as an overnight report by entering 'B'.

Press the 'ENTER' key.

Step 4: The user may go to any page by entering the page number (1-3) in the Page field or by pressing the PF8 key to move to the next page or pressing PF7 to return to the previous page. The user may exit the screen at any time by entering 'X' in the Descriptor Number field and be returned to the Find Selection Screen.

Press the 'ENTER' key.

Edit Criteria:

a. Display field must be 01 thru 86

b. Display field number must be numeric

c. Must select a minimum of one display field

d. Page may be blank, 1, 2 or 3.

e. 'D' to download the data to the PC

f. 'N' to download via the Natural Connection

g. 'B' to run as an overnight report

h. 'X' to exit

```

Purpose:

This screen prompts for the descriptor number, operator and search value for the where clause.

Called From Screen:

The Where Selection Screen 1 calls this screen.

Calls Screen:

This screen calls the Sort Selection Screen.

Instruction Steps:

Step 1: Enter the descriptor number, operator and search value.

Press the 'ENTER' key.

Step 2: If error messages appear at the bottom of the screen read the messages and correct the identified field.

Press the 'ENTER' key.

Step 3: When all error messages are corrected, a message will appear at the bottom of the screen giving the number of selected records based on the selection criteria. The user may cancel the transaction before attempting a sort by entering a 'c' in the cancel field, or may continue with the ad hoc pressing the 'ENTER' key.

Step 4: The user may exit the screen at any time by entering 'X' in the exit field. The user will return to NEMS Ad hoc Inquiries Menu.

Press the 'ENTER' key.

Edit Criteria:

a. Descriptor must be entered

b. Descriptor number must be 01 thru 72

c. Descriptor number must be numeric

d. Operators must be EQ, GT, LT, NE, GE or LE.

e. Date format must be YYYYMMDD.

f. Page may be blank, 1 or 2.

g. 'X' to exit

```

Purpose:

This menu lists all the fields available for sort selection up to 3 sorts per record.

Called From Screen:

This screen is called by the where selection screen.

Calls Screen:

This screen calls the NEMS Monthly Transaction Field Selection for Display Screen.

Instruction Steps:

Step 1: Select the descriptor you wish the record to be sorted by up to three fields. If you want to display summary level information at the break of each sort field change the "n" to a "y".

Press the 'ENTER' key.

Step 2: If error messages appear at the bottom of the screen read the messages and correct the identified field.

Press the 'ENTER' key.

Step 3: The user may exit the screen at any time prior to successful completion by entering 'X' in the Exit field.

Press the 'ENTER' key.

Edit Criteria:

a. Descriptor number must be 01 thru 19

b. Descriptor number must be numeric

c. Break field must be equal to 'n' or 'y'

d. 'X' to exit

```

Purpose:

This screen prompts for the Sort Order as well as beginning and ending values based on the sort order selected.

Called From Screen:

The NEMS Table File Ad Hoc Menu calls this screen.

Calls Screen:

This screen calls the Manufacturer's Code Table Screen.

Instruction Steps:

Step 1: Enter the Selection number corresponding the to order of the data desired as well as the beginning and ending values based on the selection made, if desired.

Press the 'ENTER' key.

Step 2: If error messages appear at the bottom of the screen read the messages and correct the identified field.

Press the 'ENTER' key.

Step 3: The user may exit the screen at any time by entering 'X' in the exit field. The user will return to the NEMS Table Number Ad hoc Menu.

Press the 'ENTER' key.

Edit Criteria:

a. '1' to order data by Manufacturer's Code

b. Beginning MFG'S Code may be any alphanumeric value.

c. Ending MFG'S Code may be any alphanumeric value.

d. '2' to order data by Manufacturer's Name

e. Beginning MFG'S Name may be any alphanumeric value.

f. Ending MFG'S Name may be any alphanumeric value.

g. 'X' to exit

3.2 NEMS CENTRAL AD HOC INQUIRIES SUBSYSTEM

The NEMS Central Ad Hoc Inquiries Subsystem is access by entering direct command '=NEMSCENT' on the main NEMS Ad Hoc Inquiries Menu.

The user may select any of the following files for ad hoc inquiries:

1. Equipment File

2. History File

Both files may be selected by ECN or by field. When browsing by field the number of records returned would be restricted to a maximum of 200 if more than 200 records meet the selection criteria.

NEMS CENTRAL RESTRICTED ACCESS MENU

```
USER-ID: XXXXX           NEMS ADHOC INQUIRIES MENU            DATE: MM/DD/YY
PROGRAM: ADH000P1        NEMS CENTRAL RESTRICTED ACCESS       TIME: HH:MM:SS

            ENTER FUNCTION OR 'X' TO EXIT: _____

                1.   EQUIPMENT FILE BY ECN
                2.   EQUIPMENT FILE BY FIELD (Max 200 Recs)
                3.   HISTORY FILE BY ECN
                4.   HISTORY FILE BY FIELD   (Max 200 Recs)
```

Purpose:

The NEMS Central Restricted Access Menu displays the functions.

Called From Screen:

The NEMS Main Menu calls this screen if direct command '=NEMSCENT' is entered.

Calls Screen:

1. List Equipment File by ECN

2. List Equipment File by Field

3. List History File by ECN

4. List History File by Field

Instruction Steps:

Step 1: The screen will appear with a list of functions. Enter the number corresponding to the function you wish to perform, '=NEMS' to return to the NEMS Main Menu or 'X' to return control to ADABAS/NATURAL.

Press the 'ENTER' key.

Step 2: If error messages appear at the bottom of the screen, read the messages and correct the identified field.

Press the 'ENTER' key.

This step may be repeated as many times as necessary.

Step 3: The user may exit the screen at any time prior to successful completion by entering 'X' in the EXIT field.

Press the 'ENTER' key.

Edit Criteria:

Valid function number or 'X'

3.2.1 <u>NEMS EQUIPMENT FILE BY ECN</u>

SELECTION SCREEN

```
USER-ID: XXXXX                     NEMS                    DATE: MM/DD/YY
 PROGRAM: ADH920P1         EQUIPMENT FILE ADHOC BY ECN        TIME: HH:MM:SS

 ENTER ECN TO BE DISPLAYED OR 'X' TO EXIT: _____

 START AT PAGE (1,2,3): 1
```

Purpose:

This screen prompts for the ECN of the record to be displayed, as well as a page selection option.

Called From Screen:

The NEMS Central Restricted Access Menu calls this screen.

Calls Screen:

This screen calls the Equipment Record Display Screen - page 1, 2, or 3 as indicated.

Instruction Steps:

Step 1: Enter the ECN of the record to be displayed. Optionally enter page 2 or 3, or accept the default, page 1.

Press the 'ENTER' key.

Step 2: If error messages appear at the bottom of the screen read the messages and correct the identified field.

Press the 'ENTER' key.

Step 3: the user may exit the screen at any time by entering 'X' in the exit field. The user will return to NEMS Ad hoc Inquiries Menu.

Press the 'ENTER' key.

Edit Criteria:

A valid ECN or 'X'

```

Purpose:

This screen lists page 1 of 3 pages of fields and prompts to enter the field number for display.

Called From Screen:

The NEMS Equipment FILE BY Field Sort Selection Menu calls this screen.

Calls Screen:

This screen calls the Equipment Record Display Screen or the Display Selection Screen 2.

Instruction Steps:

Step 1: Enter the Field Number of the record to be displayed.

Press the 'ENTER' key.

Step 2: If error messages appear at the bottom of the screen read the messages and correct the identified field.

Press the 'ENTER' key.

Step 3: The user may download the data to the PC by entering a 'D' or download via Natural Connection by entering 'N'.

Press the 'ENTER' key.

Step 4: The user may go to any page by entering the page number (1-3) in the Page field or by pressing the PF8 key to move to the next page or pressing PF7 to return to the previous page. The user may exit the screen at any time by entering 'X' in the Descriptor Number field and be returned to the Find Selection Screen.

Press the 'ENTER' key.

Edit Criteria:

a. Display field must be 01 thru 91

b. Display field number must be numeric

c. Must select a minimum of one display field

d. Page may be blank, 1, 2 or 3.

e. 'D' to download the data to the PC

f. 'N' to download via Natural Connection

g. 'X' to exit

This screen calls the sort selection screen or the Where Selection Screen page 2.

Instruction Steps:

Step 1: Enter the Descriptor Number, Operator and Search value.

Press the 'ENTER' key.

Step 2: If error messages appear at the bottom of the screen read the messages and correct the identified field.

Press the 'ENTER' key.

Step 3: When all error messages are corrected, a message will appear at the bottom of the screen giving the number of selected records based on the selection criteria. The user may cancel the transaction before attempting a sort by entering a 'C' in the cancel field, or may continue with the ad hoc by pressing the 'ENTER' key.

Step 4: The user may go to any page by entering the page number (1-3) in the Page field or by pressing the PF8 key to move to the next page or pressing PF7 to return to the previous page. The user may exit the screen at any time by entering 'X' in the Exit field and be returned to the Find Selection Screen.

Press the 'ENTER' key.

Edit Criteria:

a. Descriptor must be entered

b. Descriptor number must be 01 thru 77

c. Descriptor number must be numeric

d. Operators must be EQ, GT, LT, NE, GE or LE.

e. Date format must be YYYYMMDD.

f. Page may be blank, 1, 2 or 3.

g. 'X' to exit

4   NEMS EQUIPMENT FILE UPDATE SUBSYSTEM

The NEMS Equipment file Update Subsystem is designed to allow the user to make additions, changes, and deletions to the NEMS Equipment file in an online environment. This is accomplished through the use of specific update activities called transactions. Each transaction has a formatted screen to collect and edit the information needed to fulfill the specific purpose of the transaction. This subsystem is divided into three types of transactions:

1. Add transactions are identified by transactions numbered 01 to 24. Each transaction will add a record to the NEMS Equipment file. The Transaction should be selected that corresponds to the way in which the equipment was acquired. The Equipment file update subsystem will not permit a record to be added with the same Equipment Control Number (ECN) as one already on the Equipment file.

2. Change transactions are identified by transaction numbered 25 to 64 and are used to update existing Equipment file record to reflect an activity with that equipment. The Equipment file update subsystem will not permit changes to records that do not exist.

3. Delete Transactions are identified by transactions numbered 65 to 99 and are used to remove equipment records from the Equipment file. When the record is removed from the Equipment file it is retired to the NEMS Historical file. As before, the transaction selected should reflect the reason a record is deleted.

The Equipment file update subsystem also allows space for individual installations to insert elements for local used called Local Data. Each NASA installation must prepare supplementary instructions for local requirements beyond the scope of Agencywide policies and procedures.

The NEMS-1 is NASA Form 1602 and is the standard agency form that reflects equipment information contained in the NEMS Equipment file and controls all equipment transactions after initial entry into the NEMS Equipment file. This form serves as the property custodian's detailed record for each assigned equipment item. Most of the transactions produce a NEMS-1 form. Many transactions give the user the option of producing the NEMS-1 either batch or online. The online option will list the form on the users terminal while the batch option will produce a hardcopy of the form during a nightly production run.

NEMS EQUIPMENT FILE UPDATE MENU

```
USER-ID: XXXXX                     NEMS                  DATE: MM/DD/YY
PROGRAM: TRN000P1          EQUIPMENT FILE UPDATE MENU    TIME: HH:MM:SS

                    ENTER FUNCTION OR 'X' TO EXIT: _____

                      A=ADD    (TRANSACTIONS 01-24)

                      C=CHANGE (TRANSACTIONS 25-64)

                      D=DELETE (TRANSACTIONS 65-99)
```

Purpose:

This screen will allow the user to choose the type of update activity to be performed against the NEMS Equipment file.

Called from Screen:

This screen was called from the NEMS Main Menu, where option '2' was selected.

Calls Screens:

A. This screen can call the Add Transaction Update menu, the Change Transaction Update menu, or the Delete Transaction Update menu.

B. The user may return to the NEMS Main Menu by entering 'X'

Instruction Steps:

Step 1: Enter the code for the type of processing desired.

Press the 'ENTER' Key.

Step 2: If Error Messages appear at the bottom of the screen. Read the messages and correct the identified field.

Press the 'ENTER' key.

This step may be repeated as many time as necessary.

Step 3: The user may exit this screen at any time by entering 'X'.

Press the 'ENTER' key.

Edit Criteria:

Enter function or 'X' to Exit:

Must be 'A', 'C', 'D' or 'X'

```

Purpose:

This screen will allow the user to choose one of the Addition Transactions numbered 01 through 21. The transaction numbers and the corresponding transaction names are listed on one or more screens. The entire list may be

viewed by scrolling (Pressing the 'ENTER" key). A more detailed explanation of each transaction may be found on subsequent pages of this document.

Called from Screen:

This screen was called from the NEMS Equipment File Update menu (Functions), where option 'A' was selected.

Called Screens:

A. This screen can call transactions 01 through 21.

B. The user can return to the NEMS Equipment File Update menu (Functions) by entering 'X' in the transactions number field.

Instruction Steps:

Step 1: Enter the Transaction number, Equipment Control Number (ECN), the Previous ECN (If retag or a reference is being made to an existing ECN in order to pick up the ECN's values), and the Zip Code.

Press the 'ENTER' key.

Step 2: If Error Messages appear at the bottom of the screen, Read the messages and correct the identified field.

Press the 'ENTER' key.

This step may be repeated as many time as necessary.

Step 3: The user may exit the transactions at any time by entering 'X' in the transaction number field.

Press the 'ENTER' key.

Edit Criteria:

ECN (Equipment Control Number):

A. Must be entered

B. Must be one character alphanumeric then five characters numeric

Previous ECN (If retag or referenced to and existing ECN):

A. Must be entered

B. Must be one character alphanumeric then five characters numeric

A. Must be an ECN that is currently in the Equipment file

B. May not be entered for transaction 15 (Receipt From Return Of Record from Historical File)

C. When used as a reference, must refer to an ECN which was created by the same transaction number.

Selection Criteria:

Transaction 01 - Receipt By Purchase - NASA Funded

A. The record must not exist on the NEMS Equipment file

B. This transaction is for NASA held equipment only

Transaction 02 - Receipt By Purchase - OGA Funded

A. The record must not exist on the NEMS Equipment file

B. This transaction is for NASA held equipment only

Transaction 03 - Receipt By Purchase - Reported By Contractor

A. The record must not exist on the NEMS Equipment file

B. This transaction is for Contractor held equipment only

Transaction 04 - Receipt By Transfer - From NASA Installation

A. The record must not exist on the NEMS Equipment file

B. This transaction is for NASA held equipment only

Transaction 05 - Receipt By Transfer - From OGA

A. The record must not exist on the NEMS Equipment file

B. This transaction is for NASA held equipment only

Transaction 06 - Receipt by Transfer - From Contractor

A. The record must not exist on the NEMS Equipment file

B. This transaction is for NASA held equipment only

Transaction 07 - Receipt By Transfer - Reported by Contractor

A. The record must not exist on the NEMS Equipment file

B. This transaction is for Contractor held equipment only

Transaction 08 - Receipt From Lease In

   A. The record must not exist on the NEMS Equipment file

   B. This transaction is for NASA held equipment only

Transaction 09 - Receipt From Loan In

   A. The record must not exist on the NEMS Equipment file

   B. This transaction is for NASA held equipment only

Transaction 10 - Receipt From Fabrication

   A. The record must not exist on the NEMS Equipment file

   B. This transaction is for NASA held equipment only

Transaction 11 - Receipt From Assembly/Disassembly

   A. The record must not exist on the NEMS Equipment file

   B. This transaction is for NASA held equipment only

Transaction 12 - Receipt From Found on Station

   A. The record must not exist on the NEMS Equipment file

   B. This transaction is for NASA held equipment only

Transaction 13 - Receipt From Excess

   A. The record must not exist on the NEMS Equipment file

   B. If transferred and ritualized, a transfer record must exist on NEMS Transfer file as NPDMS 'X65' transaction

   A. If ritualized by same NASA installation, record must exist on NEMS Historical file as NPDMS 'X90' transaction

   B. This transaction is for NASA held equipment only

Transaction 14 - Receipt From Retagging

   A. The Previous ECN must exist on the NEMS Equipment file

   B. The New ECN must not exist on the NEMS Equipment file

C. This transaction is for NASA held equipment only

Transaction 15 - Receipt From Return Of Record From Historical File

A. The record must not exist on the NEMS Equipment file

B. The record must not have been retired more than 60 days prior

C. Cannot return a record if deleted by NPDMS 'X90' transaction

D. This transaction is for NASA held equipment only

Transaction 16 - Receipt From Transfer of Real to Personal Property

A. The record must not exist on the NEMS Equipment file

B. This transaction is for NASA held equipment only

Transaction 17 - Receipt From Transfer Non-Government Source

A. The record must not exist on the NEMS Equipment file

B. This transaction is for NASA held equipment only

Transaction 18 - Receipt From Transfer Not Previously Meeting Criteria For
Tagging

A. The record must not exist on the NEMS Equipment file

B. This transaction is for NASA held equipment only

Transaction 19 - Receipt From Transfer Reinstating Item Previously Surveyed

A. The record must not exist on the NEMS Equipment file

B. This transaction is for NASA held equipment only

Transaction 20 - Receipt From Borrow In

A. The record must not exist on the NEMS Equipment file

B. This transaction is for NASA held equipment only

Transaction 21 – Receipt Resulting From Conversion of Lease to Purchase

A. The Previous ECN must exist on the NEMS Equipment file

B. The New ECN must not exist on the NEMS Equipment file

C. This transaction is for NASA held equipment only

ENTER FIELD(S) TO BE ADDED - MANDATORY (*) AND OPTIONAL (_)
```

Purpose:

> Transaction 01 is used for the addition of equipment purchased and funded
> by a NASA installation. This is the add transaction most commonly used to
> enter data into the center's Equipment File. The Table File is used to
> validate the data. After the record is added to the Equipment File, a record is
> written to the Daily Transaction File.

Called From Screen:

> This transaction was called from the add transaction menu. The Equipment
> Control Number (ECN) was entered on the Add Transaction Menu.

Calls Screens:

> A. The successful completion or cancellation of this transaction will return
>   the user to the add transaction menu.
>
> B. If a 'Y' is entered in the local data field, a local data screen will be
>   supplied after all the other transaction entries are correct.
>
> C. If 'xxxxx' is entered in the manufacturer's code field, a manufacturer's
>   code screen will be supplied after all the other transaction entries are
>   correct.

Instruction Steps:

Step 1: The following steps are to be followed for each screen. A mandatory field is one which must have data entered to successfully complete the transaction and is signified by '*' on the screen. An optional field is one, which is not necessary to complete the transaction, and is signified by '_' on the screen.

Enter data in all mandatory fields and any user desired optional fields

Note that if another ECN has been referenced for the purpose of picking up the values from that record, the values from that record will appear on the screen (with the exception of ECN serial number, and contractor tag number).

Press the 'Enter' key.

Step 2: If error messages appear at the bottom of the screen, read the messages and correct the identified field.

Press the 'Enter' key.

This step may be repeated as many times as necessary.

Step 3: The user may exit the transaction at any time prior to successful completion by entering 'C' in the cancel field.

Press the 'Enter' key.

ENTER FIELD(S) TO BE ADDED - MANDATORY (*) AND OPTIONAL (_)
```

Purpose:

Transaction 03 is used for the addition of equipment purchased by a contractor, for a contractor's use, with government money. The contractor is responsible for this equipment and for reporting this acquisition and all subsequent movement to NEMS. The record is added with a pseudo key (a block of special equipment control numbers designated for contractors). The Table File is used to validate the data. After the record is added to the Equipment File, a record is written to the Daily Transaction File.

Called From Screen:

This transaction was called from the add transaction menu. The Equipment Control Number (ECN) was entered on the add transaction menu.

Calls Screens:

A. The successful completion or cancellation of this transaction will return the user to the add transaction menu.

B. If a 'y' is entered in the local data field, a local data screen will be supplied after all the other transaction entries are correct.

C. If 'xxxxx' is entered in the manufacturer's code field, a manufacturer's code screen will be supplied after all the other transaction entries are correct.

Instruction Steps:

Step 1: The following steps are to be followed for each screen. A mandatory field is one which must have data entered to successfully complete the transaction and is signified by '*' on the screen. An optional field is one that is not necessary to complete the transaction and is signified by '_' on the screen.

Enter data in all mandatory fields and any user desired optional fields

Note that if another ECN has been referenced for the purpose of picking up the values from that record, the values from that record will appear on the screen (with the exception of ECN, serial number, and contractor tag number).

Press the 'Enter' key.

Step 2: If error messages appear at the bottom of the screen, read the messages and correct the identified field.

Press the 'Enter' key.

This step may be repeated as many times as necessary.

Step 3: The user may exit the transaction at any time prior to successful completion by entering 'C' in the cancel field.

Press the 'Enter' Key.

 ENTER FIELD(S) TO BE ADDED - MANDATORY (*) AND OPTIONAL (_)
```

Purpose:

> Transaction 04 is used for the addition of equipment purchased by another NASA installation, but title and control of the equipment is now the responsibility of the receiving installation. A copy of the record in the conveying installation's Equipment File is taken to make the new record for the receiving installation's Equipment File. The conveying installation's record is retired to its Historical File after notification of arrival is received from the receiving installation. The Table File is used to validate the data. After the record is added to the Equipment File, a record is written to the Daily Transaction File.

Called From Screen:

> This transaction was called from the add transaction menu. The Equipment Control Number (ECN) was entered on the add transaction menu.

Calls Screens:

> A. The successful completion or cancellation of this transaction will return the user to the add transaction menu.

> B. If a 'y' is entered in the local data field, a local data screen will be supplied after all the other transaction entries are correct.

Instruction Steps:

Step 1: The following steps are to be followed for each screen. A mandatory field is one which must have data entered to successfully complete the transaction and is signified by '*' on the screen. An optional field is one that is not necessary to complete the transaction and is signified by '_' on the screen.

Enter data in all mandatory fields and any user desired optional fields

When adding a record as a result of an inter-center transfer, the appropriate data elements will appear on the screen from the history file record of the deleting sub-installation. When adding a record as a result of an inter-center transfer, the appropriate data elements will appear on the screen from your transfer file record.

Press the 'Enter' key.

Step 2: If error messages appear at the bottom of the screen, read the messages and correct the identified field.

Press the 'Enter' key.

This step may be repeated as many times as necessary.

Step 3: The user may exit the transaction at any time prior to successful completion by entering 'C' in the cancel field.

Press the 'Enter' key.

Edit Criteria:

ENTER FIELD(S) TO BE ADDED - MANDATORY (*) AND OPTIONAL (_)
```

Purpose:

Transaction 05 is used for the addition of equipment purchased/ controlled by another government agency, usually GSA, but title and control of the equipment is now the responsibility of the receiving installation. The Table File is used to validate the data. After the record is added to the Equipment File, a record is written to the Daily Transaction File.

Called From Screen:

This transaction was called from the add transaction menu. The Equipment Control Number (ECN) was entered on the add transaction menu.

Calls Screens:

A. The successful completion or cancellation of this transaction will return the user to the add transaction menu.

B. If a 'y' is entered in the local data field, a local data screen will be supplied after all the other transaction entries are correct.

C. If 'xxxxx' is entered in the manufacturer's code field, a manufacturer's code screen will be supplied after all the other transaction entries are correct.

Instruction Steps:

Step 1: The following steps are to be followed for each screen. A mandatory field is one which must have data entered to successfully complete the transaction and is signified by '*' on the screen. An optional field is one that is not necessary to complete the transaction and is signified by '_' on the screen.

Enter data in all mandatory fields and any user desired optional fields

Note that if another ECN has been referenced for the purpose of picking up the values from that record, the values from that record will appear on the screen (with the exception of serial number and ECN).

Press the 'Enter' key.

Step 2: If error messages appear at the bottom of the screen, read the messages and correct the identified field.

Press the 'Enter' key.

This step may be repeated as many times as necessary.

Step 3: The user may exit the transaction at any time prior To successful completion by entering 'C' in the cancel field.

Press the 'Enter' key.

 ENTER FIELD(S) TO BE ADDED - MANDATORY (*) AND OPTIONAL (_)
```

Purpose:

> Transaction 06 is used for the addition of equipment purchased/ controlled by a contractor, but title and control of the equipment is now the responsibility of the receiving installation. It is possible for the record to exist in the Equipment File under a pseudo key; however this record should be retired to the Historical File by transaction 68 (transfer of GFE by a contractor). The Table File is used to validate the data. After the record is added to the Equipment File, a record is written to the Daily Transaction File.

Called From Screen:

> This transaction was called from the add transaction menu. The Equipment Control Number (ECN) was entered on the add transaction menu.

Calls Screens:

> A. The successful completion or cancellation of this transaction will return the user to the add transaction menu.

> B. If a 'y' is entered in the local data field, a local data screen will be supplied after all the other transaction entries are correct.

> C. If 'xxxxx' is entered in the manufacturer's code field, a manufacturer's code screen will be supplied after all the other transaction entries are correct.

Instruction Steps:

Step 1: The following steps are to be followed for each screen. A mandatory field is one which must have data entered to successfully complete the transaction and is signified by '*' on the screen. An optional field is one that is not necessary to complete the transaction and is signified by '_' on the screen.

Enter data in all mandatory fields and any user

Desired optional fields

When adding a record as a result of an intra-center transfer, the appropriate data elements will appear on the screen from the history file record of the deleting sub-installation. When adding a record as a result of an inter-center transfer, the appropriate data elements will appear on the screen from your Transfer File record.

Press the 'Enter' key.

Step 2: If error messages appear at the bottom of the screen, read the messages and correct the identified field.

Press the 'Enter' key.

This step may be repeated as many times as necessary.

Step 3: The user may exit the transaction at any time prior to successful completion by entering 'C' in the cancel field.

Press the 'Enter' key.

ENTER FIELD(S) TO BE ADDED - MANDATORY (*) AND OPTIONAL (_)

```

Purpose:

Transaction 07 is used for the addition of equipment, which will be controlled by a contractor. The record is added with a pseudo key (a block of special equipment control numbers designated for contractors). The contractor is responsible for reporting any movement of controlled equipment purchased with government money. The table file is used to validate the data. After the record is added to the Equipment File, a record is added to the Daily Transaction File.

Called From Screen:

This transaction was called from the add transaction menu. The Equipment Control Number (ECN) was entered on the add transaction menu.

Calls Screens:

A. The successful completion or cancellation of this transaction will return the user to the add transaction menu.

B. If a 'y' is entered in the local data field, a local data screen will be supplied after all the other transaction entries are correct.

C. If 'xxxxx' is entered in the manufacturer's code field, a manufacturer's code screen will be supplied after all the other transaction entries are correct.

Instruction Steps:

Step 1: The following steps are to be followed for each screen. A mandatory field is one which must have data entered to successfully complete the transaction and is signified by '*' on the screen. An optional field is one that is not necessary to complete the transaction and is signified by '_' on the screen.

Enter data in all mandatory fields and any user desired optional fields

When adding a record as a result of an intra-center transfer, the appropriate data elements will appear on the screen from the history file record of the deleting sub-installation. When adding a record as a result of an inter-center transfer, the appropriate data elements will appear on the screen from your transfer file record.

Press the 'Enter' key.

Step 2: If error messages appear at the bottom of the screen, read the messages and correct the identified field.

Press the 'Enter' key.

This step may be repeated as many times as necessary.

Step 3: The user may exit the transaction at any time prior to successful completion by entering 'C' in the cancel field.

Press the 'Enter' key.

```

Purpose:

Transaction 08 is used for the addition of equipment leased from a non-NASA entity by the installation. A lease/loan document number is required for input and a special lease/loan tag is assigned. The table file is used to validate the data. After the record is added to the Equipment File, a record is written to the Daily Transaction File.

Called From Screen:

This transaction was called from the add transaction menu. The Equipment Control Number (ECN) was entered on the add transaction menu.

Calls Screens:

A. The successful completion or cancellation of this transaction will return the user to the add transaction menu.

B. If a 'y' is entered in the local data field, a local data screen will be supplied after all the other transaction entries are correct.

C. If 'xxxxx' is entered in the manufacturer's code field, a manufacturer's code screen will be supplied after all the other transaction entries are correct.

Instruction Steps:

Step 1: The following steps are to be followed for each screen. A mandatory field is one which must have data entered to successfully complete the transaction and is signified by '*' on the screen. An optional field is one that is not necessary to complete the transaction and is signified by '_' on the screen.

Enter data in all mandatory fields and any user desired optional fields

Note that if another ECN has been referenced for the purpose of picking up the values from that record, the values from that record will appear on the screen (with the exception of serial number and ECN).

Press the 'Enter' key.

Step 2: If error messages appear at the bottom of the screen, read the messages and correct the identified field.

Press the 'Enter' key.

This step may be repeated as many times as necessary.

Step 3: The user may exit the transaction at any time prior to successful completion by entering 'C' in the cancel field.

Press the 'Enter' key.

ENTER FIELD(S) TO BE ADDED - MANDATORY (*) AND OPTIONAL (_)
```

Purpose:

Transaction 12 is used for the addition of equipment that is found on the premises and for which an equipment control number has not previously been issued. The table file is used to validate the data. After the record is added to the Equipment File, a record is written to the Daily Transaction File.

Called From Screen:

This transaction was called from the add transaction menu. The Equipment Control Number (ECN) was entered on the add transaction menu.

Calls Screens:

A. The successful completion or cancellation of this transaction will return the user to the add transaction menu.

B. If a 'y' is entered in the local data field, a local data screen will be supplied after all the other transaction entries are correct.

C. If 'xxxxx' is entered in the manufacturer's code field, a manufacturer's code screen will be supplied after all the other transaction entries are correct.

Instruction Steps:

Step 1: The following steps are to be followed for each screen. A mandatory field is one which must have data entered to successfully complete the transaction and is signified by '*' on the screen. An optional field is one that is not necessary to complete the transaction and is signified by '_' on the screen.

Enter data in all mandatory fields and any user desired optional fields

Note that if another ECN's been referenced for the purpose of picking up the values from that record, the values from that record will appear on the screen (with the exception of serial number and ECN).

Press the 'Enter' key.

Step 2: If error messages appear at the bottom of the screen, read the messages and correct the identified field.

Press the 'Enter' key.

This step may be repeated as many times as necessary.

Step 3: The user may exit the transaction at any time prior to successful completion by entering 'C' in the cancel field.

Press the 'Enter' key.

ENTER FIELD(S) TO BE ADDED - MANDATORY (*) AND OPTIONAL (_)
```

Purpose:

> Transaction 17 is used for the addition of equipment received from a non-government source. He table file is used to validate the data. After the record is added to the Equipment File, a record is written to the Daily Transaction File.

Called From Screen:

> This transaction was called from the add transaction menu. The Equipment Control Number (ECN) was entered on the add transaction menu.

Calls Screens:

> A. The successful completion or cancellation of this transaction will return the user to the add transaction menu.
>
> B. If a 'y' is entered in the local data field, a local data screen will be supplied after all the other transaction entries are correct.
>
> C. If 'xxxxx' is entered in the manufacturer's code field, a manufacturer's code screen will be supplied after all the other transaction entries are correct.

Instruction Steps:

Step 1: The following steps are to be followed for each screen. A mandatory field is one which must have data entered to successfully complete the transaction and is signified by '*' on the screen. An optional field is one that is not necessary to complete the transaction and is signified by '_' on the screen.

Enter data in all mandatory fields and any user desired optional fields

Note that if another ECN has been referenced for the purpose of picking up the values from that record, the values from that record will appear on the screen (with the exception of serial number and ECN).

Press the 'Enter' key.

Step 2: If error messages appear at the bottom of the screen, read the messages and correct the identified field.

Press the 'Enter' key.

This step may be repeated as many times as necessary.

Step 3: The user may exit the transaction at any time prior to successful completion by entering 'C' in the cancel field.

Press the 'Enter' key.

```

Purpose:

Transaction 19 is used for the addition of equipment resulting from the reversal of a survey transaction (71) when the item was subsequently found. After the record is added to the Equipment File a record is written to the Daily Transaction File.

Called From Screen:

This transaction was called from the add transaction menu. The Equipment Control Number (ECN) was entered on the add transaction menu.

Calls Screens:

The successful completion or cancellation of this transaction will return the user to the add transaction menu.

Instruction Steps:

Step 1: This screen will appear with selected data fields displayed. Read the information on the screen to verify that the record displayed is the correct record. A mandatory field is one which must not be blank to successfully complete the transaction and is signified by '*' in all unused positions of the field. An optional field may be blank and is signified by '_' in all unused positions of the field.

Change the data in all desired fields.

Press the 'Enter' key.

Step 2: If error messages appear at the bottom of the screen, read the messages and correct the identified field.

Press the 'Enter' key.

This step may be repeated as many times as necessary.

Step 3: The user may exit the transaction at any time prior to successful completion by entering 'C' in the cancel field.

Press the 'Enter' key.

ENTER FIELD(S) TO BE CHANGED - MANDATORY (*) AND OPTIONAL (_)
```

Purpose:

> Transaction 21 is used for the addition of equipment when leased equipment is converted to purchased equipment. This transaction will generate transaction 87 after the record is added to the Equipment File, a record is written to the Daily Transaction File.

Called From Screen:

> This transaction was called from the add transaction menu. The Equipment Control Number (ECN) was entered on the add transaction menu.

Calls Screens:

> The successful completion or cancellation of this transaction will return the user to the add transaction menu.

Instruction Steps:

> Step 1: This screen will appear with selected data fields displayed. Read the information on the screen to verify that the record displayed is the correct record. A mandatory field is one which must not be blank to successfully complete the transaction and is signified by '*' In all unused positions of the field. An optional field may be blank and is signified by '_' in all unused positions of the field.
>
> Change the data in all desired fields.

Press the 'Enter' key.

Step 2: If error messages appear at the bottom of the screen, read the messages and correct the identified field.

Press the 'Enter' key.

Step 3: The user may exit the transaction at any time prior to successful completion by entering 'C' in the cancel field.

Press the 'Enter' key.

Edit Criteria:

Acq Document Control No:

A. Mandatory

B. Must be entered left justified

Date Inst Acquired:

A. Optional

B. Must be numeric

C. Must be in 'yy mm dd' format

D. Cannot be greater than current year

Cost:

A. Mandatory

B. Must be numeric

C. Can be entered left or right justified (stored right justified with leading zeros

D. Can be entered with pennies (left or right justified). A decimal point '.' followed by two numbers will denote pennies (ex. '5634.50').

Capital/Sensitive Code:

A. Mandatory

B. Must be on Table 130

User No:

A. Optional

B. Must be entered left justified

64    LOCAL DATA UPDATE (NON REPORTABLE)
```

Purpose:

This screen will allow the user to choose one of the Addition Transactions numbered 25 through 64. The transaction numbers and the corresponding transaction names are listed on one or more screens. The entire list may be viewed by scrolling (Pressing the 'ENTER" key). A more detailed explanation of each transaction may be found on subsequent pages of this document.

Called from Screen:

This screen was called from the NEMS Equipment File Update menu (Functions), where option 'C' was selected.

Called Screens:

A. This screen can call transactions 25 through 64.

B. The user can return to the NEMS Equipment File Update menu (Functions) by entering 'X' in the transactions number field.

Instruction Steps:

Step 1: Enter the Transaction number, Equipment Control Number (ECN), and the Custodian Account Number for NASA - Held Equipment

or

Enter the Transaction number, Equipment Control Number (ECN), and the Contractor (Accountable) and the Contractor Tag Number for Contractor - Held Equipment

Press the 'ENTER' key.

Step 2: If Error Messages appear at the bottom of the screen, Read the messages and correct the identified field.

Press the 'ENTER' key.

This step may be repeated as many time as necessary.

Step 3: The user may exit the transactions at nay time by entering 'X' in the transaction number field.

Press the 'ENTER' key.

Edit Criteria:

ECN (Equipment Control Number):

A. Must be entered

B. Must be one character alphanumeric then five characters numeric

Custodian Account No:

A. Must be entered for NASA Held Equipment

B. Must match what is currently in the record

Contractor (Accountable):

A. Must be entered for Contractor Held equipment

B. Must match what is currently in the record

C. Can be entered right or left justified (stored right justified with leading spaces)

Contractor Tag No:

A. Must be entered for Contractor Held equipment

B. Must match what is currently in the record

314

C. Can be entered right or left justified (stored right justified with leading paces)

Selection Criteria:

Transaction 25 - Cost (Change)

A. The record must exist on the NEMS Equipment file

B. This transaction is for NASA held or Contractor held equipment

Transaction 26 - Custodian Account (Change)

A. The record must exist on the NEMS Equipment file

B. This transaction is for NASA held equipment only

Transaction 27 - Date Available (Change)

A. The record must exist on the NEMS Equipment file

B. This transaction is for NASA held or Contractor held equipment

Transaction 28 - Date Lease/Loan/Borrow Out Due (Change)

A. The record must exist on the NEMS Equipment file

B. The equipment must be loaned, leased, or borrowed out

A. This transaction is for NASA held equipment only

Transaction 29 - Equipment Location (Change)

A. The record must exist on the NEMS Equipment file

B. This transaction is for NASA held equipment only

Transaction 30 - Status Code (Change)

A. The record must exist on the NEMS Equipment file

B. This transaction is for NASA held or Contractor held equipment

Transaction 31 - User Number (Change)

A. The record must exist on the NEMS Equipment file

B. This transaction is for Contractor held equipment only

Transaction 38 - Borrowed Out

    A. The record must exist on the NEMS Equipment file

    B. The equipment must not already be in and 'Out' Status

    C. This transaction is for NASA held equipment only

Transaction 39 - Borrowed Out-Returned

    A. The record must exist on the NEMS Equipment file

    B. The equipment must be borrowed out

    C. This transaction is for NASA held equipment only

Transaction 40 - Loan/Leased Out

    A. The record must exist on the NEMS Equipment file

    B. The equipment must not already be in an 'Out' Status

    C. This transaction is for NASA held equipment only

Transaction 41 - Loan/Lease Out-Returned

    A. The record must exist on the NEMS Equipment file

    B. The equipment must be loaned/leased out

    C. This transaction is for NASA held equipment only

Transaction 42 - Loan Pool Out

    A. The record must exist on the NEMS Equipment file

    B. The equipment must not already be in an 'Out' status

    C. This transaction is for NASA held equipment only

Transaction 43 - Loan Pool Out-Returned

    A. The record must exist on the NEMS Equipment file

    B. The equipment must be loaned pooled out

    C. This transaction is for NASA held equipment only

Transaction 44 - Storage In

A. The record must exist on the NEMS Equipment file

B. The New ECN must not exist on the NEMS Equipment file

C. This transaction is for NASA held equipment only

Transaction 45 - Storage In-Returned

A. The record must exist on the NEMS Equipment file

B. The equipment must be in storage

C. This transaction is for NASA held equipment only

Transaction 46 - Capital/Sensitive Code and National Stock No. Change

A. The record must exist on the NEMS Equipment file

B. This transaction is for NASA held equipment only

Transaction 50 - Freeze Number Assignment

A. The record must exist on the NEMS Equipment file

B. This transaction is for NASA held equipment only

Transaction 51 - Freeze Number Removal

A. The record must exist on the NEMS Equipment file

B. The record must currently have a freeze number assigned

C. This transaction is for NASA held equipment only

Transaction 52 - Excess Equipment Turn-In by Custodian

A. The record must exist on the NEMS Equipment file

B. This transaction is for NASA held equipment only

Transaction 56 - Repair Update

A. The record must exist on the NEMS Equipment file

B. This transaction is for NASA held equipment only

Transaction 57 - Off-Site For Repair

A. The record must exist on the NEMS Equipment file

B. This transaction is for NASA held equipment only

Transaction 60 - NASA Held Equipment Record Data (Change)

A. The record must exist on the NEMS Equipment file

B. This transaction is for NASA held equipment only

Transaction 62 - Global (Change)

None

Transaction 63 - Reverse Add (Change)

A. The record must exist on the NEMS Equipment file

B. The Record must exist on the NEMS Daily or Monthly Transaction file

C. No cost change transactions have been applied

D. This transaction is for NASA held equipment only

Transaction 64 - Local Data Update (Non-Reportable)

A. The record must exist on the NEMS Equipment file

         ADJUSTING THE COST BELOW $100000 (NO CAPITALIZED VALUE) WILL CHANGE
         A 'P' TO AN 'N' OR AN 'M' TO A 'Q'.

ENTER FIELD(S) TO BE CHANGED - MANDATORY (*) AND OPTIONAL (_)
```

Purpose:

> Transaction 25 is used to adjust the cost or change the estimated cost code
> fields for an Equipment File record when an error has occurred or a
> modification is necessary. After the record is updated on the Equipment File,
> a record is written to the Daily Transaction File.

Called From Screen:

> This transaction was called from the change transaction menu. The
> Equipment Control Number (ECN) was entered on the change transaction
> menu.

Calls Screens:

> A. The successful completion or cancellation of this transaction will return
>   the user to the change transaction menu.
>
> B. If a 'y' is entered in the local data field, a local data screen will be
>   supplied after all the other transaction entries are correct.

Instruction Steps:

> Step 1: This screen will appear with selected data fields displayed. Read the
>   information on the screen to verify that the record displayed is the
>   correct record. A mandatory field is one which must not be blank to
>   successfully complete the transaction and is signified by '*' in all
>   unused positions of the field. An optional field may be blank and is

signified by '_' in all unused positions of the field. Enter the data in all desired fields.

Press the 'Enter" key

Step 2: If error messages appear at the bottom of the screen, read the messages and correct the identified field.

Press the 'Enter' key.

This step may be repeated as many times as necessary.

Step 3: The user may exit the transaction at any time prior to successful completion by entering 'C' in the cancel field.

Press the 'Enter' key.

Edit Criteria:

Adjustment Cost:

A. Mandatory (if replacement cost is not entered)

B. Should reflect the amount of change of the cost field.

C. Can be a subtraction (enter a '-' in the first position).

D. Can contain pennies (a decimal '.' followed by two numbers).

E. All other position must be numeric or blank.

F. Examples: To add $435 to the cost enter: 435

To add $213.56 enter: 213.56

To subtract $1,569 enter: -1569

To subtract $842.42 enter: -842.42

G. Can be used for either a cost change if previously entered in error, or as a formal cost adjustment with supporting documentation (see adjustment reference document. below).

Replacement Cost:

A. Mandatory (if adjustment cost is not entered)

B. Should reflect the new cost amount.

C. Can contain pennies (a decimal '.' followed by two numbers).

D. All other position must be numeric or blank.

E. Can be used for either a cost change if previously entered in error, or as a formal cost adjustment with supporting documentation (see adjustment reference document. below).

Estimated (Y):

A. Optional

B. Must be either 'y' or spaces

Adjustment Reference Doc:

A. Optional

B. Left justified

C. The document number initiating a cost adjustment

Local Data (y):

A. Optional

B. Must be either 'y' or spaces

NEMS-1 Batch (B), Online (O), or None (N):

A. Mandatory

                                         ENTER 'C' TO CANCEL: _____

ENTER FIELD(S) TO BE CHANGED - MANDATORY (*) AND OPTIONAL (_)
```

Purpose:

Transaction 28 is used to change the date due fields for a record on the Equipment File when a change in the due dates are foreseen. After the record is updated on the Equipment File, a record is written to the Daily Transaction File.

Called From Screen:

This transaction was called from the change transaction menu. The Equipment Control Number (ECN) was entered on the change transaction menu.

Calls Screens:

A. The successful completion or cancellation of this transaction will return the user to the change transaction menu.

B. If a 'y' is entered in the local data field, a local data screen will be supplied after all the other transaction entries are correct.

Instruction Steps:

Step 1: This screen will appear with selected data fields displayed. Read the information on the screen to verify that the record displayed is the correct record. A mandatory field is one which must not be blank to successfully complete the transaction and is signified by '*' in all

unused positions of the field. An optional field may be blank and is signified by '_' in all unused positions of the field. Change the data in all desired fields.

Press the 'Enter' key.

Step 2: If error messages appear at the bottom of the screen, read the messages and correct the identified field.

Press the 'Enter' key.

This step may be repeated as many times as necessary.

Step 3: The user may exit the transaction at any time prior to successful completion by entering 'C' in the cancel field.

Press the 'Enter' key.

Edit Criteria:

Date Loan/Lease/Borrow Out Due:

A. Optional

B. Should only be changed if exists

C. Cannot be blanked out

D. Must be numeric

E. Must be in 'yy mm dd' format

F. Must be greater than date installation acquired

G. Must be greater than date loaned, date leased or date borrowed (whichever is applicable)

Date Storage Due:

A. Optional

B. Should only be changed if exists

A. C. Cannot be blanked out

D. Must be numeric

E. Must be in 'yy mm dd' format

ENTER FIELD(S) TO BE CHANGED - MANDATORY (*) AND OPTIONAL (_)
```

Purpose:

Transaction 41 is used to change the Equipment File record for equipment that has been loaned or leased by a non-NASA entity and is now being returned. All information pertaining to the loan/lease is removed. The Table File is used to validate the data. After the record is updated on the Equipment File, a record is written to the Daily Transaction File.

Called From Screen:

This transaction was called from the change transaction menu. The Equipment Control Number (ECN) was entered on the change transaction menu.

Calls Screens:

A. The successful completion or cancellation of this transaction will return the user to the change transaction menu.

B. If a 'y' is entered in the local data field, a local data screen will be supplied after all the other transaction entries are correct.

Instruction Steps:

Step 1: This screen will appear with selected data fields displayed. Read the information on the screen to verify that the record displayed is the correct record. A mandatory field is one which must not be blank to

successfully complete the transaction and is signified by '*' in all unused positions of the field. An optional field may be blank and is signified by '_' in all unused positions of the field. Change the data in all desired fields.

Press the 'Enter' key.

Step 2: If error messages appear at the bottom of the screen, read the messages and correct the identified field.

Press the 'Enter' key.

This step may be repeated as many times as necessary.

Step 3: The user may exit the transaction at any time prior to successful completion by entering 'C' in the cancel field.

Press the 'Enter' key.

> Transaction 46 is used to change the capital/sensitive code or national stock number of an Equipment File record. Changing the capital/sensitive code may require a user number be added. Therefore, this transaction also allows the user number to be altered.

Called From Screen:

> This transaction was called from the change transaction menu. The ECN and custodian account number were entered on the menu.

Calls Screens:

> This screen will return to the change transaction menu.

Instruction Steps:

> Step 1: This screen will appear with selected data fields displayed. Read the information on the screen to verify that the record displayed is the correct record. A mandatory field is one which must not be blank to successfully complete the transaction and is signified by '*' in all unused positions of the field. An optional field may be blank and is signified by '_' in all unused positions of the field. Change the data in all desired fields.

Press the 'Enter' key.

Step 2: If error messages appear at the bottom of the screen, read the messages and correct the identified field.

Press the 'Enter' key.

This step may be repeated as many times as necessary.

Step 3: The user may exit the screen at any time prior to successful completion by entering 'C' in the cancel field.

Press the 'Enter' key.

Edit Criteria:

National Stock No:

A. First four positions mandatory

B. First four positions must be numeric

C. Last nine positions optional

D. First two positions must be on Table 050

User No:

A. Optional

B. Must be entered left justified

C. Must be on Table 090

Capital/Sensitive Code:

A. Mandatory

B. Must be on Table 130

B. Selection limited by cost

B. Selection limited if item in borrowed state

NEMS-1 Batch (B), Online (O), or None (N):

A. Mandatory

B. Must be 'b', 'o' or 'n'

Enter 'C' to cancel:

    A. Optional

    B. Must be either 'C' or spaces

Generated Fields For Equipment File:

    A. Equipment type account from table 050 unless acquisition transaction number is 08 or 09

    B. Transaction number

    C. Entry reference number

    D. Date inventoried from current date

Purpose:

Transaction 60 is used to change the equipment file record for NASA-held equipment that has many fields to be changed, occurring most often when data entry errors have occurred. The table files are used to validate the data.

Called From Screen:

This transaction can be called from any of the transaction 60 screens.

Calls Screens:

A. This screen can call transaction 60, screen 3.

B. The cancellation of this screen will return the user to transaction 60, screen 1.

C. If 'xxxxx' is entered in the manufacturer's code field, a manufacturer's code screen will be supplied after all the other transaction entries are correct.

Instruction Steps:

Step 1: This screen will appear with selected data fields displayed. Read the information on the screen to verify that the record displayed is the

correct record. A mandatory field is one which must not be blank to successfully complete the transaction and is signified by '*' in all unused positions of the field. An optional field may be blank and is signified by '_' in all unused positions of the field. Change the data in all desired fields.

Press the 'Enter' key.

Step 2: If error messages appear at the bottom of the screen, read the messages and correct the identified field.

Press the 'Enter' key.

This step may be repeated as many times as necessary.

Step 3: The user may exit the screen at any time prior to successful completion by entering 'C' in the cancel field, or may call any of the other transaction 60 screens by entering the appropriate page number in the page number field.

Press the 'Enter' key.

              (EQUIPMENT FIELDS ON PAGE 1)
```

Purpose:

Transaction 60 is used to change the Equipment File record for NASA-held equipment that has many fields to be changed, occurring most often when data entry errors have occurred. The table files are used to validate the data.

Called From Screen:

This screen can be called from any of the Transaction 60 screens.

Calls Screens:

A. This screen can call transaction 60, screen 1.

B. Cancellation of this screen will return the user to

A. Transaction 60.

Instruction Steps:

Step 1: This screen will appear with selected data fields displayed. Read the information on the screen to verify that the record displayed is the correct record. A mandatory field is one which must not be blank to successfully complete the transaction and is signified by '*' in all unused positions of the field. An optional field may be blank and is signified by '-' in all unused positions of the field.

Change the data in all desired fields.

Press the 'Enter' key.

Step 2: If error messages appear at the bottom of the screen, read the messages and correct the identified field.

Press the 'Enter' key.

This step may be repeated as many times as necessary.

Step 3: The user may exit this screen at any time prior to successful completion by entering 'C' in the cancel field, or may call any of the other Transaction 60 screens by entering the appropriate page number in the page number field.

Press the 'Enter' key.

Edit Criteria:

4.2.23 TRANSACTION 62 - GLOBAL CHANGE PROCESSING MENU

```
USER-ID: XXXXX              GLOBAL PROCESSING MENU            DATE: MM/DD/YY
PROGRAM: TRN062P1                                            TIME: HH:MM:SS

                    ENTER SELECTION OR 'X' TO EXIT: _____

                    1 - DESCRIPTION OF GLOBAL PROCESSING

                    2 - PROCESS THE GLOBAL

                    3 - ALTER CURRENTLY SCHEDULED GLOBAL
```

Purpose:

This screen allows the user to select the options of global processing.

Called From Screen:

This screen is called from the change transaction menu

Calls Screens:

A. The successful completion or cancellation of this menu will return the user to the change transaction menu.

B. If '1' is entered on the selection prompt, a global processing description screens will be supplied.

C. If '2' is entered on the selection prompt, a global change qualifier selection menu will be supplied.

D. If '3' is entered on the selection prompt, a screen will display the currently scheduled globals. The user may alter the processing of these globals.

E. If '4' is entered on the selection prompt, a global delete qualifier selection menu will be supplied.

Instruction Steps:

Step 1: Enter the selection, Press Enter key.

Step 2: If error messages appear at the bottom of the screen, read the messages and correct the error.

Press the 'Enter' key.

This step may be repeated as many times as necessary.

Step 3: The user may exit this screen at any time by entering 'x' in the exit field. The user will return to the change transaction menu.

Press the 'Enter' key.

Edit Criteria:

Selection must be either 'x' or '1' or '2' or '3' or '4'

A. 'X' to exit

B. '1' Description of globals processing

C. '2' Process of global change

D. '3' Alter scheduled globals

D. '4' Process of global delete

4.2.23.1 TRANSACTION 62 - GLOBAL CHANGE DESCRIPTION

```
USER-ID: XXXXX           NEMS - 62 - GLOBAL (CHANGE)        DATE: MM/DD/YY
PROGRAM: TRN062PE                                           TIME: HH:MM:SS
                              DESCRIPTION

GLOBAL  CHANGE  TRANSACTION  ALLOWS  THE  USER TO CHANGE A SPECIFIED FIELD IN A
GROUP OF RECORDS.

FOR A GLOBAL CHANGE TRANSACTION, THE USER IS SUPPLIED WITH THE OPTION TO SELECT
ALL RECORDS, OR TO  CHOOSE UP TO THREE QUALIFIERS AS RECORD SELECTION CRITERIA.
IF QUALIFIERS  ARE  SELECTED, ANOTHER SCREEN  WILL  BE  DISPLAYED  SO  THAT THE
BEGINNING  AND ENDING RANGE MAY BE ENTERED FOR EACH SELECTED QUALIFIER.

ONCE  RECORD  SELECTION  QUALIFIERS  AND THEIR BEGINNING  AND ENDING VALUES ARE
SELECTED,  A SCREEN WILL BE DISPLAYED SHOWING THE FIELDS WHICH ARE ELIGIBLE FOR
GLOBAL  CHANGE.  THE USER IS ALLOWED TO SELECT ONLY ONE (1) FIELD TO BE CHANGED
PER TRANSACTION.  ONCE THE FIELD HAS BEEN SELECTED, ANOTHER  SCREEN WILL PROMPT
THE ENTRY OF THE 'OLD' (CURRENT) VALUE  AND  THE 'NEW' VALUE  TO WHICH IT IS TO
BE CHANGED.

                       (PRESS ENTER TO CONTINUE)
```

Purpose:

This screen allows the user to read the description of transaction and continue to the second page of description.

Called From Screen:

This screen is called from the global change transaction menu

Calls Screens:

A. This screen will call the second page of the Transaction 62 description.

Instruction Steps:

Step 1: Press 'Enter' to continue

TRANSACTION 62 - GLOBAL CHANGE DESCRIPTION

```
USER-ID: XXXXX            NEMS - 62 - GLOBAL (CHANGE)        DATE: MM/DD/YY
PROGRAM: TRN062PE                                            TIME: HH:MM:SS
                               DESCRIPTION

IF  ONLY  A  SPECIFIED 'OLD' VALUE  IS TO BE CHANGED, IT MUST BE ENTERED ON THE
SCREEN IN THE 'OLD' VALUE FIELD. IF THE 'OLD' VALUE IS TO BE CHANGED REGARDLESS
OF THE VALUE, AN EXCLAMATION POINT (!) MUST BE ENTERED IN EVERY POSITION OF THE
'OLD' VALUE  FIELD.  IF THE 'OLD' VALUE  IS  BLANK, A QUESTION MARK (?) MUST BE
ENTERED  IN  EVERY POSITION OF THE 'OLD' VALUE  FIELD.  LIKEWISE, IF  THE 'NEW'
VALUE FIELD IS TO BE BLANK, A QUESTION MARK  MUST BE  ENTERED IN EVERY POSITION
OF THE 'NEW' VALUE FIELD.

LOCAL DATA IS HANDLED ON A CHARACTER BY CHARACTER BASIS. IN OTHER WORDS, IF THE
FOURTH  CHARACTER  OF  THE 'OLD' LOCAL DATA FIELD IS SPECIFIED AS 'X', THE ONLY
TIME  THE  FOURTH  POSITION  WILL  BE CHANGED IS WHEN THE OLD VALUE IS 'X'.  TO
CHANGE  A  GIVEN  POSITION IN THE LOCAL DATA FIELD REGARDLESS OF ITS OLD VALUE,
ENTER  AN  EXCLAMATION  POINT (!) IN THAT POSITION OF THE OLD LOCAL DATA FIELD.
TO SPECIFY A POSITION TO BE CHANGED TO BLANK, ENTER A QUESTION MARK (?) IN THAT
POSITION IN THE NEW LOCAL DATA FIELD.

                           (PRESS ENTER TO CONTINUE)
```

Purpose:

This screen allows the user to read the description of transaction and continue to the third page of description.

Called From Screen:

This screen is called from the first screen of global change description.

Calls Screens:

A. This screen will call the third page of the Transaction 62 description.

Instruction Steps:

Step 1: Press 'Enter' to continue

TRANSACTION 62 - GLOBAL CHANGE DESCRIPTION

```
USER-ID: XXXXX           NEMS - 62 - GLOBAL (CHANGE)          DATE: MM/DD/YY
PROGRAM: TRN062PE                                             TIME: HH:MM:SS
                              DESCRIPTION

GENERATED CHANGES:

WHEN  CUSTODIAN  ACCOUNT IS CHANGED, THE CUSTODIAN  NUMBER  AND CUSTODIAN  ORG
CODE IS GENERATED  FOR  THE  NEW CUSTODIAN ACCOUNT, AND  WHEN  NATIONAL  STOCK
NUMBER IS CHANGED, A CHANGE TO EQUIPMENT TYPE ACCOUNT IS GENERATED.

ALSO NOTE THAT CUSTODIAN NUMBER, CUSTODIAN ORG CODE AND EQUIPMENT TYPE ACCOUNT
MAY BE CHANGED SEPARATELY.

ENTER '1' TO GO TO PAGE 1, 'X' TO EXIT, OR BLANK TO CONTINUE:    _____
```

Purpose:

> This screen allows the user to read the description of transaction and
> continue processing.

Called From Screen:

> This screen is called from the second screen of Transaction 62 description.

Calls Screens:

> A. Successful completion of this screen will call the global transaction menu
>
> B. The cancellation of this transaction will return the user to the change
>   transaction menu
>
> C. A '1' entered in the selection will return the user to the first page of the
>   transaction description

Instruction Steps:

> Step 1: This screen will display the third page of the transaction description.
>
> > Enter '1' to return to the first description screen
> >
> > Press the 'Enter' key.
> >
> > Enter 'x' to return to the change transaction menu

Press the 'Enter' key.

Enter ' ' to return to the global transaction menu

Press the 'Enter' key.

Step 2: If error messages appear at the bottom of the screen, read the messages and correct the error.

Press the 'Enter' key.

This step may be repeated as many times as necessary.

Step 3: The user may exit this screen at any time prior to successful completion by entering 'x' in the selection field.

Press the 'Enter' key.

Edit Criteria:

Request must be either '1' or 'x' or ' '

Enter 'x' to exit:

A. Optional

Enter '1' to return to first page:

A. Optional

Enter ' ' to continue:

A. Optional

4.2.23.2 TRANSACTION 62 - GLOBAL CHANGE QUALIFYING SELECTION

```
USER-ID: XXXXX           NEMS - 62 - GLOBAL (CHANGE)          DATE: MM/DD/YY
PROGRAM: TRN062P2                                             TIME: HH:MM:SS

ENTER UP TO THREE QUALIFIERS FOR SELECTION:  __ __ __
           OR
ENTER 'A' TO SELECT ENTIRE FILE:  _

01 - ECN                 13 - CUSTODIAN NUMBER      25 - CONTRACTOR TAG NUMBER

12 - CUST ACCT NUMBER    24 - DATE CALIBRATION DUE
                                        ENTER 'C' TO CANCEL:  _____
```

Purpose:

This screen allows the user to specify up to three fields that are to be used in qualifying records to be selected for update via the global change transaction. If 'a' (all) is specified, all records belonging to the user's installation will be processed.

Called From Screen:

This screen is called from the second page of the transaction description screen.

Calls Screens:

A. The successful completion of this screen will call the beginning and ending value selection menu for the specified qualifier (unless 'all' was specified).

B. The cancellation of this transaction will return the user to the change transaction menu.

Instruction Steps:

Step 1: This screen will display all fields that may be used as selection criteria.

Enter 'a' to process all records belonging to your installation or select up to three fields for record selection within your installation.

Press the 'Enter' key.

Step 2: If error messages appear at the bottom of the screen, read the messages and correct the identified field.

Press the 'Enter' key.

This step may be repeated as many times as necessary.

Step 3: The user may exit this screen at any time prior to successful completion by entering 'C' in the cancel field.

Press the 'Enter' key.

Edit Criteria:

1. If all records for your installation are to be processed, enter 'a'.

2. If selected records are to be processed, enter up to three (3) qualifiers. Only records belonging to your installation are available for selection.

3. No qualifiers may be entered when 'a' is specified

4. If qualifiers are selected

    A. Qualifiers must be numeric

    B. Same qualifier must not be entered twice

    C. Qualifiers must be 01 through 35 (leading zero is not required)

Enter 'C' to cancel:

A. Optional

B. Must be either 'C' or spaces

TRANSACTION 62 - GLOBAL CHANGE BEGINNING AND ENDING VALUES

```
USER-ID: XXXXX            NEMS - 62 - GLOBAL (CHANGE)          DATE: MM/DD/YY
PROGRAM: TRN062P3               QUALIFIERS                     TIME: HH:MM:SS

                  DATE CALIBRATION DUE              FIRST QUALIFIER
STARTING VALUE:   _____
ENDING VALUE:     _____
LENGTH            ....+.

                  *** NOT SELECTED ***             SECOND QUALIFIER
STARTING VALUE:   _____
ENDING VALUE:     _____

                  *** NOT SELECTED ***             THIRD QUALIFIER
STARTING VALUE:   _____
ENDING VALUE:     _____
LENGTH
                                         ENTER 'C' TO CANCEL:  _____
NOTE: DO NOT TYPE BEYOND LENGTH DISPLAYED FOR EACH FIELD
```

Purpose:

This screen allows the user to enter a starting and ending value for each selected qualifier. No records will be processed which do not meet the value ranges for the specified qualifiers.

Called From Screen:

This screen is called from the qualifier selection menu.

Calls Screens:

A. The successful completion of this screen will call the screen to select the field to be changed

B. The cancellation of this transaction will return the user to the record qualifying selection menu.

Instruction Steps:

Step 1: This screen will appear with selected qualifiers displayed. Read the information on the screen to verify that the qualifiers displayed are correct.

Enter beginning and ending values for each qualifier.

Notes: Both values must be entered for each qualifier. Do not type past the 'length' index below each delimiter input field.

Press the 'Enter' key.

Step 2: If error messages appear at the bottom of the screen, read the messages and correct the identified field.

Press the 'Enter' key.

This step may be repeated as many times as necessary.

Step 3: The user may exit this screen at any time prior to successful completion by entering 'C' in the cancel field.

Press the 'Enter' key.

Edit Criteria:

1. For a selected qualifier both beginning and ending values must be entered.

2. Beginning value must not be greater than ending value

3. Must not exceed the length for a specified field.

    OLD VALUE: ** ** **   (YY MM DD FORMAT)

    NEW VALUE: ** ** **   (YY MM DD FORMAT)

                                    ENTER 'C' TO CANCEL:  _____
1.  TO SPECIFY ALL OLD VALUES, ENTER ALL EXCLAMATION POINTS (!) IN THE 'OLD'
    VALUE FIELD.

2.  TO SPECIFY A NEW VALUE AS BLANK, ENTER ALL QUESTION MARKS (?) IN THE 'NEW'
    VALUE FIELD.
```

Purpose:

This screen allows the entry of the 'old' (current) value of the field to be changed and the 'new' value to which it is to be changed. Successful completion of this screen will generate a global change transaction record that will be placed in a file for overnight processing.

Called From Screen:

This screen is called from the change transaction field selection menu.

Calls Screens:

A. The successful completion of this screen will call the transaction confirmation screen.

B. The cancellation of this screen will return the user to the change transaction field selection menu.

Instruction Steps:

Step 1: This screen will appear with the selected data field displayed. Read the information on the screen to verify that the field displayed is correct.

Enter the 'old' and 'new' values.

Press the 'Enter' key.

Step 2: If error messages appear at the bottom of the screen, read the messages and correct the identified field.

Press the 'Enter' key.

This step may be repeated as many times as necessary.

Step 3: The user may exit this screen at any time prior to successful completion by entering 'C' in the cancel field.

Press the 'enter' key.

Edit Criteria:

Must enter 'old' and 'new' value

Item Name:

Must be entered left justified

Manufacturer's - Code:

A. Must be on table 040

B. Must be entered left justified

Manufacturer's - Model No:

Must be entered left justified

Year Manufactured:

Must be numeric

National Stock No:

A. First four positions must be numeric

B. Last nine positions optional

C. First two positions must be on Table 050

Availability Status Code:

A. Must be on Table 410

Date Status Coded:

    A. Must be numeric

    B. Must be in 'yy mm dd' format

    C. Cannot be greater than current year

Custodian Account No:

    A. Must be entered left justified

    B. Must be on Table 078

Custodian Number:

    A. Must be entered left justified

    B. Must be on Table 078

Custodian Org Code:

    A. Must be entered left justified

    B. Must be on Table 078

User No:

    A. Must be entered left justified

    B. Must be on Table 090

Location - Zip Code:

    Must be entered left justified

Location - Building:

    A. Must be entered left justified

    B. Must be on Table 102

Location - Room:

    A. Must be entered left justified

    B. No further edits

Equipment Type Acct:

    A. Must be entered left justified

    B. Must be on Table 052

Date Available:

    A. Must be numeric

    B. Must be in 'yy mm dd' format

Condition Code:

    A. Can be entered left or right justified (stored right justified with leading spaces)

    B. Must be on table 510

Hazardous Material Code:

    A. Must be on Table 180

    B. No further edits

Precious Metal Code:

    A. Must be on Table 182

    B. No further edits

Date Warranty Exp - Materials:

    A. Must be numeric

    B. Must be in 'yyyy mm' format

    C. 'YYYY' must not be less than year manufactured

Date Warranty Exp - Labor:

    A. Must be numeric

    B. Must be in 'yyyy mm' format

    C. 'YYYY' must not be less than year manufactured

Contractor (Accountable):

Can be entered left of right justified (stored right justified with leading spaces)

Date Loan/Lease/Borrow In Due:

A. Must be numeric

B. Must be in 'yy mm dd' format

Date Loaned Out:

A. Must be numeric

B. Must be in 'yy mm dd' format

C. Must not be greater than current date

Date Leased Out:

A. Must be numeric

B. Must be in 'yy mm dd' format

C. Must not be greater than current date

Date Borrowed Out:

A. Must be numeric

B. Must be in 'yy mm dd' format

Equip Mgmt Code:

Must be on Table 155

Local Data:

No edits

Location:

A. Must be entered left justified

B. An error message will be displayed and the user will not be allowed to change the location, if the inventory is being conducted by grid location and the old and/or the new location is currently undergoing inventory.

Enter 'x' to exit:

A. Optional

B. Must be either 'x' or spaces

TRANSACTION 62 - GLOBAL CHANGE LOCAL DATA

```
USER-ID: XXXXX              NEMS - 62 - GLOBAL (CHANGE)          DATE: MM/DD/YY
PROGRAM: TRN062P4                                               TIME: HH:MM:SS

LOCAL DATE

    OLD VALUE:
    _____
    ....+....1....+....2....+....3....+....4....+....5....+....6....+....7

    NEW VALUE:
    _____
    ....+....1....+....2....+....3....+....4....+....5....+....6....+....7

                                    ENTER 'C' TO CANCEL:  _____
1.  TO SPECIFY ALL OLD VALUES FOR A GIVEN POSITION, ENTER AN EXCLAMATION POINT
    (!) IN THE POSITION OF THE 'OLD' VALUE FIELD.

2.  TO SPECIFY A NEW VALUE AS BLANK, ENTER A QUESTION MARK (?) IN THE
    POSITION IN THE 'NEW' VALUE FIELD.
```

Purpose:

This screen will be called from the field selection screen when a request is made to change local data. This screen is similar to the normal 'old and new' value entry screen except that an index line is displayed below the value entry fields. Another feature of the local data screen is that each of the seventy characters in the local data field is treated as a separate field.

Called From Screen:

This screen is called from the change transaction field selection menu.

Calls Screens:

A. The successful completion of this screen will call the transaction confirmation screen.

B. The cancellation of this transaction will return the user to the change transaction field selection menu.

Instruction Steps:

Step 1: This screen will appear with a seventy (70) character field to enter local data.

Enter the 'old' and 'new' values for desired positions.

Press the 'Enter' key.

Step 2: If error messages appear at the bottom of the screen, read the messages and correct the identified field.

Press the 'Enter' key.

This step may be repeated as many times as necessary.

Step 3: The user may exit this screen at any time prior to successful completion by entering 'C' in the cancel field.

Press the 'Enter' key.

Edit Criteria:

'Old' and 'new':

Mandatory

Enter 'C' to cancel:

Optional

TRANSACTION 62 - CONFIRMATION SCREEN #1

ENTER SEQUENCE NUMBER AND SELECTION:  ___
(P = POSTPONE, C = CANCEL, ' ' = ON SCHEDULE, D = DETAIL DISPLAY): _

               (PRESS ENTER TO VIEW LIST AGAIN)
```

Purpose:

This screen lists all the globals scheduled to run during the night. Identifying information such as entry-ref-no, process- switch, date scheduled, requesting user-id, qualifiers, change field number, request to print NEMS-1 and Report 500 is displayed on online line, with a maximum of ten per screen. Output may span more than one screen. Scheduled global deletes are displayed with '**' in the Change No field.

Called From Screen:

The global processing menu calls this screen.

CALLS SCREEN:

Upon completion, this screen calls the detail display of selected global.

Instruction Steps:

Step 1: Information concerning all globals scheduled to run that night is displayed on the screen. Any of the global change may be postponed, canceled, or placed on schedule by entering the global sequence number and the new status in the appropriate input fields.

Press the 'Enter' key.

Step 2: If error messages appear at the bottom of the screen, read the messages and correct the identified field.

Press the 'Enter' key.

This step may be repeated as many times as necessary.

Step 3: The user may exit the screen at any time by entering 'x' in the exit field. The user will return to the global change processing menu.

Press the 'Enter' key.

Edit Criteria:

Exit Field:

A. 'X' or blank

Sequence Number:

A. Mandatory

B. Must be in the range of the global sequence numbers

New Status Field:

A. Must be blank, 'p', 'C' or 'd'

1. Blank - rescheduled to run tonight

2. 'C' - cancel the global processing

3. 'P' - postpone the global processing

4. 'D' - display the detail information pertaining to a selected global change request

```

Purpose:

> Transaction 63 is used to correct the cost of a record recently added to the Equipment File. The add transaction must exist on either the monthly or daily transaction files. After the record is updated on the equipment and transaction files, a record is written to the Daily Transaction File.

Called From Screen:

> This transaction was called from the change transaction menu. The Equipment Control Number (ECN) was entered on the change transaction menu.

Calls Screens:

> A. The successful completion or cancellation of this transaction will return the user to the change transaction menu.
>
> B. If a 'y' is entered in the local data field, a local data screen will be supplied after all the other transaction entries are correct.

Instruction Steps:

> Step 1: This screen will appear with selected data fields displayed. Read the information on the screen to verify that the record displayed is the correct record. A mandatory field is one which must not be blank to successfully complete the transaction and is signified by '*' in all

unused positions of the field. An optional field may be blank and is signified by '_' in all unused positions of the field. Enter the data in all desired fields.

Press the 'Enter' key.

Step 2: If error messages appear at the bottom of the screen, read the messages and correct the identified field.

Press the 'Enter' key.

This step may be repeated as many times as necessary.

Step 3: The user may exit the transaction at any time prior to successful completion by entering 'C' in the cancel field.

Press the 'Enter' key.

Edit Criteria:

Cost:

A. Mandatory

B. Should reflect the new cost amount.

C. Can contain pennies (a decimal '.' followed by two numbers).

D. All other position must be numeric or blank.

Local Data (y):

A. Optional

B. Must be either 'y' or spaces

NEMS-1 batch (b), online (o), or none (n):

A. Mandatory

B. Must be 'b', 'o' or 'n'

Enter 'C' to cancel:

A. Optional

B. Must be either 'C' or spaces

Generated Fields For Equipment File:

    A. Cap sens code

    B. Transaction number

    C. Entry reference number

99    UPDATE LOCAL DATA ON HISTORY (NON-REPORTABLE)

```

Purpose:

This screen will allow the user to choose one of the Addition Transactions numbered 65 through 99. The transaction numbers and the corresponding transaction names are listed on one or more screens. The entire list may be viewed by scrolling (Pressing the 'ENTER" key). A more detailed explanation of each transaction may be found on subsequent pages of this document.

Called from Screen:

This screen was called from the NEMS Equipment File Update menu (Functions), where option 'D' was selected.

Called Screens:

A. This screen can call transactions 65 through 99.

B. The user can return to the NEMS Equipment File Update menu (Functions) by entering 'X' in the transactions number field.

Instruction Steps:

Step 1: Enter the Transaction number, Equipment Control Number (ECN), and the Custodian Account Number for NASA - Held Equipment

Press the 'ENTER' key.

Step 2: If Error Messages appear at the bottom of the screen, Read the messages and correct the identified field.

Press the 'ENTER' key.

This step may be repeated as many time as necessary.

Step 3: The user may exit the transactions at nay time by entering 'X' in the transaction number field.

Press the 'ENTER' key.

Edit Criteria:

ECN (Equipment Control Number):

A. Must be entered

B. Must be one character alphanumeric then six characters numeric

Custodian Account No:

A. Must be entered for NASA Held Equipment

B. Must match what is currently in the record

Selection Criteria:

Transaction 65 - Transfer To Another NASA Installation

This transaction is for NASA held or Contractor held equipment

Transaction 66 - Transfer To Other Government Agency

A. The record must exist on the NEMS Equipment file

B. The equipment must not be loaned or leased into NASA

C. The equipment must not be borrowed, loaned, leased or loan pooled out

D. This transaction is for NASA held equipment only

Transaction 67 - Transfer Of GFE to a Contractor

A. The record must exist on the NEMS Equipment file

B. The equipment must not be loaned or leased into NASA

C. The equipment must not be borrowed, loaned, leased or loan pooled out

D. This transaction is for NASA held or Contractor held equipment

Transaction 69 - Lease In-Returned

A. The record must exist on the NEMS Equipment file

B. The equipment must be leased into NASA

C. The equipment must not be borrowed, loaned, leased or loan pooled out

D. This transaction is for NASA held equipment only

Transaction 70 - Loaned In-Returned

A. The record must exist on the NEMS Equipment file

B. The equipment must be loaned into NASA

C. The equipment must not be borrowed, loaned, leased or loan pooled out

D. This transaction is for NASA held or Contractor held equipment

Transaction 71 - Survey (Missing Equipment)

A. The record must exist on the NEMS Equipment file

Transaction 72 - Decontrol (Removal Of Tag)

A. The record must exist on the NEMS Equipment file

B. This transaction is for NASA held equipment only

Transaction 73 - Deletes Resulting From Assembly/Disassembly

A. The record must exist on the NEMS Equipment file

B. The equipment must not be loaned or leased into NASA

C. The equipment must not be borrowed, loaned, leased or loan pooled out

D. This transaction is for NASA held equipment only

Transaction 74 - Delete From Retag

A. The record must exist on the NEMS Equipment file

B. This transaction is for NASA held equipment only

Transaction 80 - Disposal of NASA Held Equipment Transaction (Cond Code More than 7) By Custodian

A. The record must exist on the NEMS Equipment file

B. The equipment must not be loaned or leased into NASA

C. This transaction is for NASA held equipment only

Transaction 81 - Disposal of NASA Held Equipment By NEMS Reutilization Coordinator

A. The record must exist on the NEMS Equipment file

B. The equipment must not be loaned or leased into NASA

C. The Cap Sens Code must be 'M, 'P' or 'Q'. Also may be 'N' but cost must be greater than or equal to $5000.00.

D. The Condition Code must not be 'S' or 'X'

E. This transaction is for NASA held equipment only

Transaction 85 - Delete Resulting From Trade-In

A. The record must exist on the NEMS Equipment file

B. This transaction is for NASA held equipment only

Transaction 86 - Transfer To Real Property

A. The record must exist on the NEMS Equipment file

B. This transaction is for NASA held equipment only

Transaction 87 - Delete - Lease To Purchase

A. The record must exist on the NEMS Equipment file

B. This transaction is for NASA held equipment only

Transaction 99 - Update of Local Data On History (Non-Reportable)

4.3.1 TRANSACTION 65 - TRANSFER TO ANOTHER NASA INSTALLATION

CONTRACTOR (ACCOUNTABLE):             CONTRACTOR TAG NO:
ITEM NAME: DISPLAY UNIT               MODEL NO: MX15F
MFG NAME: MAG TECHNOLOGY CO           SERIAL NO: MA1233067171
ITEM COST: 600.00

DATE SHIPPED: ** ** **                INSTALLATION (RECEIVER): 0000
BORROW OUT DUE DATE: 00 00 00         DOCUMENT NUMBER: _____
                                      LOCAL DATA (Y): Y

                PRESS ENTER TO CONTINUE OR 'C' TO CANCEL: _____
```

Purpose:

> Transaction 65 is used to delete a record from the equipment file for NASA-held equipment that is being transferred to a custodian at another installation. The record will be retired to the conveying installation's Historical File and moved to the receiving installation's Equipment File via the Suspense File. A record will also be written to both installations Daily Transaction Files.

Called From Screen:

> This transaction was called from the delete transaction menu. The Equipment Control Number (ECN) was entered on the delete transaction menu.

Calls Screens:

A. The successful completion or cancellation of this transaction will return the user to the delete transaction menu.

B. If the default value of the local data is not blanked out, a screen to enter the local data will be provided after all other transaction entries are correct.

Instruction Steps:

Step 1: This screen will appear with selected data fields displayed. Read the information on the screen to verify that the record displayed is the correct record. A mandatory field is one which must not be blank to successfully complete the transaction and is signified by '*' in all unused positions of the field. An optional field may be blank and is signified by '_' in all unused positions of the field.

Enter the required data.

Press the 'Enter' key.

Step 2: If error messages appear at the bottom of the screen, read the messages and correct the identified field.

Press the 'Enter' key.

This step may be repeated as many times as necessary.

Step 3: The user may exit the transaction at any time prior to successful completion by entering 'C' in the cancel field.

Press the 'Enter' key.

Edit Criteria:

Date Shipped:

A. Mandatory

B. Must not be greater than current date

C. Must be in 'yy mm dd' format

Installation (receiver):

A. Mandatory

B. Must be on Table 252

Local Data (y):

A. Optional

B. Must be either 'y' or spaces

Cancel:

A. Optional

B. Must be either 'C' or spaces

Generated Fields For Historical File:

A. Transaction number

B. Entry reference number

C. Delete date

D. Capitalization amount

PRESS ENTER KEY TO DELETE THIS RECORD
```

Purpose:

> Transaction 81 is used to delete a record from the equipment file for NASA-
> held equipment that has been screened by EVS, and is now considered
> excess to NASA. The record will be retired to the Historical File and a record
> will be written to the Daily Transaction File.

Called From Screen:

> This transaction was called from the delete transaction menu. The
> Equipment Control Number (ECN) was entered on the delete transaction
> menu.

Calls Screens:

A. The successful completion or cancellation of this transaction will return
    the user to the delete transaction menu.

B. If the default value of the local data is not blanked out, a screen to enter
    the local data will be provided after all other transaction entries are
    correct.

Instruction Steps:

Step 1: This screen will appear with selected data fields displayed. Read the information on the screen to verify that the record displayed is the correct record.

Press the 'Enter' key.

Step 2: the user may exit the transaction at any time prior to successful completion by entering 'C' in the cancel field.

Press the 'Enter' key.

Edit Criteria:

Note: Cap sens code must be 'm' or 'p' or 'q' or 'n' if cost is greater than or equal to $500.

Condition Code:

A. Mandatory

B. Must be on table 510

C. Cannot be 's' or 'x' or blank

 CANCEL OR NAVIGATION COMMAND WILL CAUSE LOCAL DATA
          NOT TO BE ADDED/CHANGED
```

Purpose:

   Additions or changes to local data on a History File record are entered here.
   If this screen is called from a delete transaction, the daily transaction record
   created by that program will be updated as well as the history record. If the
   screen is called from Transaction 99, only the history record is updated.

Called From Screen:

   This transaction was called from the delete transaction menu, the record
   selection screen for Transaction 99, or the delete transaction programs if
   local data update is requested.

Calls Screens:

   After successful completion or cancellation, the user is returned to the delete
   transaction menu

5   REPORT SELECTION SUBSYSTEM

The report selection subsystem allows the user to control the processing of
NEMS reports. The NEMS reports are designed to be scheduled (cyclical
reports) or submitted (On-Request reports) online, then processed overnight in
batch mode. If they are cyclical reports, their next effective run date is adjusted
by the proper frequency. Both effective run date and frequency are established

when the report is initially scheduled. With the five options of this subsystem you can accomplish the following functions:

List regularly scheduled reports by their frequency. These reports are scheduled to run on a predetermined frequency without user intervention. The report is listed with its frequency, next effective run date, and its distribution information.

Select On-Request reports. All reports in the NEMS system are listed on a series of screens. The user selects the report to be run by its report number. This will be a one time only run. If the report requires input parameters a second screen is used to capture this information. Finally, a screen displaying default distribution information is displayed; users may change this to fit their needs. If a cyclical report is selected, it does not affect the reports scheduled production timing.

1. Alter currently scheduled jobs. A screen is displayed showing all cyclical and On-Request report scheduled to run that night. The users can alter report status in any of three ways:

    a. Postpone (p) the report so that it will run the following night. If this is a cyclical report its next production date is unaffected.

    b. Cancel (c) the report. If it is an On-Request report it will be deleted from the list of reports scheduled to be produced. If it is a cyclical report its next effective production date will be set ahead by its previously established frequency.

    c. Return a previously postponed, or canceled report to its scheduled execution (blank). This change can only be made prior to the nightly batch run.

2. Change regularly scheduled reports. This option allows the user to add, change or delete a regularly scheduled, cyclical report. when adding, the report must be unique on the basis of its report number, effective production date, installation (account and sub-account), and frequency. An exception is daily reports, where only one report per report number may be added regardless of the effective production date. Changing a report entails changing only the distribution data and/or effective date, which is collected on a separate screen. The same data is collected when adding a report. The user can never change how a report looks. To change the effective production date and/or frequency, delete the old report, and add a new one. Regardless of which action the user wishes, the report must exist on the report number table. Reports 130 - 134 and 138 use the entered frequency value to compute the default range start date for record selection y date due. The time span a frequency represents ('1' for daily, '2' for weekly, etc.) is

subtracted from the computed default range stop date. for example, the report is executed on 06/30/90. The range stop date is computed by adding 3 months on to this date giving 09/30/90. A frequency of '1' (daily) will return a start date of 09/29/90, '2' (weekly) will return 09/23/90, '4' (monthly) will return 08/30/90, '8' (annual) will return 08/30/89, etc.

3. Change standard report distribution. By report distribution it is meant: distribution (office or individual to whom operations will deliver the physical report), mail stop, number of copies, printer destination code (the actual printer which will print the report or ADOSS), report print type (either Xerox or printed hardcopy), and binding instructions, if Xerox.

As in the other NEMS subsystems, information is displayed, entered, and edited through a series of screens. Errors are displayed on the bottom two lines of the screen and the user is given as many attempts as is necessary to enter the data. If for any reason the user wishes to leave a screen without any activity being initiated, every screen has either an exit or cancel field to allow this.

NEMS Report Selection Menu

```
USER-ID: XXXXX                    NEMS                    DATE: MM/DD/YY
PROGRAM: RPT000P1          REPORT SELECTION MENU          TIME: HH:MM:SS

         ENTER FUNCTION OR 'X' TO EXIT: _____

             1.  LIST REGULARLY SCHEDULED REPORTS BY FREQUENCY

             2.  SELECT ON-REQUEST REPORTS

             3.  ALTER CURRENTLY SCHEDULED JOBS

             4.  CHANGE REGULARLY SCHEDULED REPORTS

             5.  CHANGE STANDARD REPORT DISTRIBUTION
```

Purpose:

The NEMS Report Selection menu displays the report functions that the user is authorized to use.

Called From Screen:

The NEMS Main Menu calls this screen.

Calls Screen:

At present, there are five report functions that the user may invoke. They are:

1. List regularly scheduled jobs by frequency

2. Select On-Request reports

3. Alter currently scheduled jobs

4. Change regularly scheduled reports

5. Change standard report distribution

   These screens return to the NEMS Report Selection menu.

Upon completion, this screen calls the NEMS Main Menu.

Instruction Steps:

Step 1: The screen will appear with a list of authorized functions. Enter the number corresponding to the function you wish to perform or 'X' to return to the NEMS Main Menu.

Press the 'ENTER' key.

Step 2: If error messages appear at the bottom of the screen, read the messages and correct the identified field.

Press the 'ENTER' key.

This step may be repeated as many times as necessary.

Edit Criteria:

Valid function number or 'X'

5.1   LIST REGULARLY SCHEDULED REPORTS BY FREQUENCY SCREEN

```
USER-ID: XXXXX        NASA EQUIPMENT MANAGEMENT SYSTEM        DATE: MM/DD/YY
PROGRAM: RPTLSTP1            (INSTALLATION NAME)              TIME: HH:MM:SS
                       CYCLICAL REPORTS LISTED BY FREQUENCY

NUMBER: 010
NAME: DAILY TRANSACTION REGISTER (BY TRANS NO)
FREQUENCY: DAILY
EFFECTIVE DATE: 96/11/15
INSTALLATION NUMBER: 0808 (INSTALLATION NAME)
DISTRIBUTION: NEMS CONTROL
MAIL STOP: 4471
NUMBER OF COPIES:   1
DESTINATION: 041
XEROX/PRINT: PRINT
BINDING:

ENTER ' ' TO CONTINUE OR 'X' TO EXIT: _____
```

Purpose:

This menu lists the regularly scheduled reports by their frequency starting with daily and proceeding through triennial. Two reports will be displayed per screen.

Called From Screen:

The NEMS Report Selection Menu calls this screen.

Calls Screen:

Upon completion, this screen calls the NEMS Report Selection menu.

Instruction Steps:

Step 1: A screen will appear with one cyclical report. To continue to view reports, leave the exit field blank. The listing of reports will start over after all the reports have been shown. To return to the NEMS Report Selection menu, place 'X' in the exit field.

Press the 'ENTER' key.

Step 2: If error messages appear at the bottom of the screen, read the messages and correct the identified field.

Press the 'ENTER' key.

This step may be repeated as many times as necessary.

Edit Criteria:

Blank or 'X'

5.2   NEMS ON-REQUEST REPORT SELECTION MENU

```
USER-ID: XXXXX                    NEMS                    DATE: MM/DD/YY
PROGRAM: RPTSELP1     ON-REQUEST REPORT SELECTION MENU    TIME: HH:MM:SS

ENTER REPORT NUMBER OR 'X' TO EXIT: _____

007  DAILY TRANSACTION REPORT BY ENTRY REFERENCE NO *MSFC*
008  DAILY TRANSACTION REPORT FOR USER ID_*MSFC*
010  DAILY TRANSACTION REGISTER (BY TRANS NO)
011  DAILY TRANSACTION REGISTER (BY TRANS NO EXPLODED)
012  DAILY TRANSACTION REGISTER (BY ECN)
013  DAILY TRANSACTION REGISTER (BY ENTRY REF NO)
015  NEMS ITEM NAME VALIDATION REPORT
020  CUSTODIAN MONTHLY TRANSACTION REPORT
030  MONTHLY/ANNUAL TRANSACTION STATISTICAL SUMMARY
050  LIST ERROR CODE TABLES
110  MANUFACTURER'S CODE XXXXX SUSPENSE REPORT
120  PROPERTY LOCATION REPORT
130  LOANED (IN) EQUIPMENT EXPIRATION REPORT

                    (MORE REPORTS ON NEXT PAGE)
```

Purpose:

This menu lists all the On-Request Reports in the NEMS system in report number order, thirteen per screen.

Called From Screen:

The NEMS Report Selection menu calls this screen and by either the NEMS Report Distribution Information screen or a report selection criteria screen.

Calls Screen:

This screen calls the NEMS Report Distribution Information screen, or a Report Selection Criteria screen if the report needs selection criteria.

1. Upon completion, this screen calls the NEMS Report Selection menu.

Instruction Steps:

Step 1: Select the report you wish to submit for overnight processing. The report number entered does not have to be on the screen being viewed, it need only be a valid report number. If there are other screens to be viewed, leave the report number field blank. To return to the NEMS Report Selection menu, place 'X' in the report number field.

Press the 'ENTER' key.

Step 2: If error messages appear at the bottom of the screen, read the messages and correct the identified field.

Press the 'ENTER' key.

This step may be repeated as many times as necessary.

Edit Criteria:

A valid report number, blank, or 'X'

BEGINNING EQUIPMENT BUILDING:          _____   (DEFAULT IS '        A')
ENDING EQUIPMENT BUILDING:             _____   (DEFAULT IS '9999999999')

                                        ENTER 'C' TO CANCEL: _____
```

Purpose:

This screen displays the fields that are the basis of selecting records to be used in the report. The user enters whichever values are required. The report will be produced based on the values entered, or the default values.

Called From Screen:

The NEMS On-Request Report Selection menu calls this screen.

Calls Screen:

Upon completion, this screen calls the NEMS Report Distribution Information screen.

Instruction Steps:

Step 1: The selection fields are displayed with their default values. The user enters the desired values, or leaves the fields blank, which will cause the default values to be used in report selection. Either default can be used in conjunction with an entered value or both defaults may be used. To select a single value for a field, enter that value in both the beginning and ending ranges.

Press the 'ENTER' key.

Step 2: If error messages appear at the bottom of the screen, read the messages and correct the identified field.

Press the 'ENTER' key.

This step may be repeated as many times as necessary.

Step 3: The user may cancel the submission at any time prior to successful completion by entering 'C' in the cancel field. The user will return to the NEMS On-Request Report Selection menu.

Press the 'ENTER' key.

Edit Criteria:

                         MARSHALL SPACE FLIGHT CENTER

                  1324 STATISTICAL SUMMARY OF CONTROLLED EQUIPMENT

 BEGINNING DATE: 2003 02 14 (DEFAULT IS '2003 02 14' (YYYY MM DD) FORMAT)
 ENDING DATE:    2003 08 13 (DEFAULT IS '2003 08 13' (YYYY MM DD) FORMAT)

ENTER 'C' TO CANCEL: _____
```

Purpose:

> This screen displays the fields that are the basis of selecting records to be used in the report. The user enters whichever values are required. The report will be produced based on the values entered, or the default values.

Called From Screen;

> The NEMS On-Request Report Selection menu calls this screen.

Calls Screen:

> Upon completion, this screen calls the NEMS Report Distribution Information Screen.

Instruction Steps:

Step 1: The selection fields are displayed with their default values. The user enters the desired values, or leaves the fields blank, which will cause the default values to be used in report selection. Either default can be used in conjunction with an entered value or both defaults may be used. To select a single value for a field, enter that value in both the beginning and ending ranges.

> Press the 'ENTER' key.

Step 2: If error messages appear at the bottom of the screen, read the messages and correct the identified field.

Press the 'ENTER' key.

This step may be repeated as many times as necessary.

Step 3: The user may cancel the submission at any time prior to successful completion by entering 'C' in the cancel field. The user will return to the NEMS On-Request Report Selection menu.

Press the 'ENTER' key.

Edit Criteria:

Date Due

    a. Must be numeric
    b. Must be in format 'YYYYMMDD'
    c. Beginning value must be less than or equal to the ending value.

 Cancel Field:

  a. 'C' or blank.

Instruction Steps:

   Step 1: The selection fields are displayed with their default values. The user enters the desired values, or leaves the fields blank, which will cause the default values to be used in report selection. Either default can be used in conjunction with an entered value or both defaults may be used. To select a single value for a field, enter that value in both the beginning and ending ranges.

            Press the 'ENTER' key.

   Step 2: If error messages appear at the bottom of the screen, read the messages and correct the identified field.

Press the 'ENTER' key.

This step may be repeated as many times as necessary.

Step 3: The user may cancel the submission at any time prior to successful completion by entering 'C' in the cancel field. The user will return to the NEMS On-Request Report Selection menu.

Press the 'ENTER' key.

Edit Criteria:

Month

a. Must be numeric

b. Beginning value must be less than or equal to the ending value

Cancel Field:

a. 'C' or blank

```

Purpose:

This screen displays the fields that are the basis of selecting and sorting records used in the report. The user selects the criteria he would like to use to create the report, and then enters the range of values for those criteria. The report will be produced based on the criteria selected and the entered values.

Called From Screen:

The NEMS On-Request Report Selection menu calls this screen.

Calls Screen:

Upon completion, this screen calls the NEMS Report Distribution Information screen.

Instruction Steps:

Step 1: The selection fields are displayed with their default values. The user enters the desired values, or leaves the fields blank, which will cause the default values to be used in report selection. Either default can be used in conjunction with an entered value or both defaults may be used. To select a single value for a field, enter that value in both the beginning and ending ranges.

Press the 'ENTER' key.

Step 2: If error messages appear at the bottom of the screen, read the messages and correct the identified field.

Press the 'ENTER' key.

This step may be repeated as many times as necessary.

Step 3: The user may cancel the submission at any time prior to successful completion by entering 'X' in the selection field. The user will return to the NEMS On-Request Report Selection menu.

Press the 'ENTER' key.

Edit Criteria:

Selection Field:

a. '1', '2', or 'X'

Installation Sub Account

a. Beginning value must be less than or equal to the ending value

b. Range for one sort selection cannot be specified if the opposite sort is selected.

Custodian Account Number

a. Beginning value must be less than or equal to the ending value

b. Range cannot be specified if the custodian name selection is specified.

Custodian Name

a. Beginning value must be less than or equal to the ending value

ENTER SEQ. NUMBER: __ AND NEW STATUS (P=POSTPONE, C=CANCEL, ' '=ON SCHEDULE) _

                       (MORE REPORTS ON NEXT PAGE)
```

Purpose:

This screen lists all the jobs scheduled to run during the night. Identifying information such as effective date, status, number of copies, distribution, and frequency is displayed for each job. Each job and its information is displayed on one line, with maximum of ten per screen. Output may span more than one screen.

Called From Screen:

The NEMS Report Selection menu calls this screen.

Calls Screen:

Upon completion, this screen calls the NEMS Report Selection menu.

Instruction Steps:

Step 1: Information concerning all jobs scheduled to run that night is displayed on the screen. Any of the jobs may be postponed, canceled, or placed on schedule by entering the report sequence number and the new status in the appropriate input fields.

Press the 'ENTER' key.

Step 2: If error messages appear at the bottom of the screen, read the messages and correct the identified field.

Press the 'ENTER' key.

This step may be repeated as many times as necessary.

Step 3: The user may exit the screen at any time by entering 'X' in the exit field. The user will return to the NEMS Report Selection menu.

Press the 'ENTER' key.

Edit Criteria:

Exit Field:

a. 'X' or blank

Sequence Number:

a. Mandatory

b. Must be in the range of the report sequence numbers

New Status Field:

a. Must be blank, 'p' or 'C'

1. Blank - Rescheduled to run tonight

2. 'C' - Cancel job

3. 'P' - Postpone job until tomorrow

5.4   NEMS REGULARLY SCHEDULED REPORTS SCREEN 1

```
USER-ID: XXXXX          NEMS REGULARLY SCHEDULED REPORTS        DATE: 10/14/97
PROGRAM: RPTCHGP1                                               TIME: 14:49:37
ENTER FUNCTION (A=ADD, C=CHANGE, D=DELETE, X=EXIT): _____

REPORT NUMBER: ____
EFFECTIVE DATE(YYYY MM DD): _____ __ __
INSTALLATION NUMBER: 0808  MARSHALL SPACE FLIGHT CENTER

     9.   BIENNIAL (2 YEAR ANNIVERSARY)
    10.   TRIENNIAL (3 YEAR ANNIVERSARY)
```

Purpose:

   This screen is the first of two screens used to add, change or delete regularly scheduled reports. This screen captures the information necessary to either find the report, or, in the case of an add, ensure it will be unique. Once this is done, a second screen is called for input of Report Distribution Information.

Called From Screen:

   The NEMS Report Selection menu calls this screen.

Calls Screen:

   a.   This screen calls the second NEMS regularly scheduled reports distribution screen.

   b.   Upon completion, this screen calls the NEMS Report Selection menu.

Instruction Steps:

   Step 1: A screen is displayed with areas for entering the function, report number, effective date, start and stop installation (which will default to the user's installation and sub-installation), and frequency. Enter the desired information. To return to the NEMS Report Selection menu, place and 'X' in the function field.

            Press the 'ENTER' key.

   Step 2: If error messages appear at the bottom of the screen, read the messages and correct the identified field.

Press the 'ENTER' key.

This step may be repeated as many times as necessary.

Edit Criteria:

Function:

    a. Mandatory

    b. Must be 'a', 'C', 'd', or 'X'

Report Number:

    a. Mandatory

    b. Must be a unique value on the report number table

Effective Date:

    a. Mandatory

    b. Must be numeric

    c. Must be in 'YYYY MM DD' format

    d. Must be greater than or equal to the current date

Installation Number From:

    a. Mandatory

    b. Must be four positions

    c. Must be numeric

    d. Must be valid installation from Table 252.

Installation Number To:

    a. Mandatory

ENTER FIELD(S) TO BE ADDED
```

Purpose:

   This screen is the second of two screens used to add, change or delete regularly scheduled reports. This screen is used to enter distribution information concerning the report.

Called From Screen:

   The first NEMS regularly scheduled reports screen calls this screen.

Calls Screen:

   Upon completion, this screen calls the first NEMS regularly scheduled reports screen.

Instruction Steps:

   Step 1: A screen with the previously entered function, start and stop installations, report number, effective date, and frequency will be displayed. With the exception of effective date, these fields are protected. Blank fields will be provided to enter distribution information. Enter the necessary information in the fields provided.

Press the 'ENTER' key.

Step 2: If error messages appear at the bottom of the screen, read the messages and correct the identified field.

Press the 'ENTER' key.

This step may be repeated as many times as necessary.

Step 3: The user may cancel the function at any time prior to successful completion by entering 'C' in the cancel field. The user will return to the first NEMS regularly scheduled reports screen.

Press the 'ENTER' key.

Edit Criteria:

Effective Date:

a. Mandatory

b. May not create a report request record that duplicates an existing record for the values of effective date, report number, report frequency, and installation (account and sub-account).

c. Must be in 'YYYY MM DD' format

                                               ENTER 'C' TO CANCEL: _
```

Purpose:

   This screen lists the standard Report Distribution Information for the NEMS
system. The user may modify it as their needs require. This information will be
used as the default for the submission of On-Request reports.

Called From Screen:

   The NEMS Report Selection menu calls this screen.

Calls Screen:

   Upon completion, this screen calls the NEMS Report Selection menu.

Instruction Steps:

   Step 1: The standard Report Distribution Information will be displayed on the
            screen. Change whichever fields you need to meet your
            requirements.

            Press the 'ENTER' key.

   Step 2: If error messages appear at the bottom of the screen, read the
            messages and correct the identified field.

            Press the 'ENTER' key.

            This step may be repeated as many times as necessary.

Step 3: The user may cancel the change at any time prior to successful completion by entering 'C' in the cancel field. The user will return to the NEMS Report Selection menu.

Press the 'ENTER' key.

Edit Criteria:

c. If report print type is 'p', then a binding instruction must not be entered

Cancel Field:

a. 'C' or blank

6   PART 6 - TABLE FILE UPDATE SUBSYSTEM

6.1   NEMS TABLE FILE UPDATE SUBSYSTEM

Enter the NEMS Table Update Process by selecting the Table File update option (5) on the NEMS Main Menu. This option passes control to the table update program. This program displays the Table File Update Menu, which lists those tables the user is authorized to update. By selecting a valid table number, transactions may be entered to add, change or delete records for the selected table. The exit option will return control to the NEMS Main Menu.

There are three types of table update functions: add, change, and delete. One of these functions must be selected and the appropriate table-key element must be entered. This table-key is required to properly identify the Table file record to be updated. The table-key entered for the add function must be unique for the table being updated; therefore duplicate records will not exist. The table-key entered for a change or delete must already exist on the table being updated. The exit option will return control to the NEMS Table file update menu.

When a valid function and table-key have been entered, a screen will be displayed indicating data elements for which information must be entered to update the selected table. All elements on this data collection screen are considered mandatory and will be edited for content. The cancel option will return the user to the previous screen without updating the record. The data in the record being updated will be displayed.

6.1.1 NEMS Table File Update Menu

```
 USER-ID: XXXXX                                              DATE: MM/DD/YY
 PROGRAM: TBL000P1        NEMS TABLE FILE UPDATE MENU        TIME: HH:MM:SS

              ENTER TABLE NUMBER OR 'X' TO EXIT: _____

                 S01  TABLE DESCRIPTION AND AUTHORIZATION
                 S02  ERROR CODES AND MESSAGES TABLE
                 S04  SEQUENCE NUMBER TABLE

                 132  U. S. TREASURY AGENCY NUMBER TABLE
                 155  EQUIPMENT MANAGEMENT CODE TABLE

                     (MORE TABLES ON NEXT PAGE)

```

Purpose:

> The Table File update menu displays those tables that the user is authorized to update.

Called From Screen:

> The NEMS Main Menu calls this screen.

Calls Screen:

> a. This screen calls the appropriate update screen for the selected NEMS Table.
>
> b. Upon completion, this screen calls the NEMS Main Menu.

Instruction Steps:

> Step 1: The screen will appear with a list of tables the user is authorized to update. Enter the table number corresponding to the NEMS Table you wish to update. To return to the NEMS Main Menu, place 'X' in the table number field.
>
> Press the 'ENTER' key.
>
> Step 2: If error messages appear at the bottom of the screen, read the messages and correct the identified field.

Press the 'ENTER' key.

This step may be repeated as many times as necessary.

Edit Criteria:

A valid table number or 'X'

6.1.2 NEMS - 078 - Custodian Account Number Table, Screen #1

```
USER-ID: XXXXX                                                   DATE: MM/DD/YY
PROGRAM: TBL078P1  NEMS - 078 - CUSTODIAN ACCOUNT NUMBER TABLE  TIME: HH:MM:SS

ENTER FUNCTION (A=ADD, C=CHANGE, D=DELETE, X=EXIT): _____

CUSTODIAN ACCOUNT NUMBER: _____

CUSTODIAN INSTALLATION SUB-ACCOUNT: 08
```

Purpose:

This screen is the first of two screens used to add, change or delete records
on NEMS Table 078. This screen captures the information necessary to
either find the record, or, in the case of an add, ensure it will be unique.
Once this is done, a second screen is called for input of required information.

When a delete is attempted, the program checks to see if the custodian
account is referenced on any records in the Equipment, Inventory, PCM
Authority or PCM Pending files. If so, messages are displayed on a modified
version of this screen. (see the next page)

Called From Screen:

The NEMS Table file update menu calls this screen.

Calls Screen:

a. This screen calls the second data collection screen for Table 078.

b. Upon completion, this screen calls the NEMS Table file update menu.

Instruction Steps:

Step 1: A screen is displayed with areas for entering the function, custodian account number, and the custodian installation sub-account. Enter the desired information. To return to the NEMS Table file update menu, enter 'X' in the function field.

Press the 'ENTER' key.

Step 2: If error messages appear at the bottom of the screen, read the messages and correct the identified field.

In the case of delete messages, the conflicting records from the Equipment, Inventory, PCM Authority or PCM Pending files will have to be changed or deleted prior to completing the deletion of the custodian account.

Press the 'ENTER' key.

Edit Criteria:

Function:

a. Mandatory

b. Must be 'A', 'C', 'D' or 'X'

Custodian Account Number:

Mandatory

a. For add updates, a record must not exist on Table 078 with the same custodian account number and installation sub-account.(See below)

b. For change and delete updates, a record must exist on Table 078 with the same custodian account number and installation sub-account.(See below)

c. For delete updates, deletion will be prevented if any of the following conditions exist:

- There are any Equipment file records that have the same custodian account and installation sub-account.

- Inventory by custodian is open for the sub-installation and the custodian account is open for inventory (either unprocessed or processed).

- There are any PCM Authority records that have the same custodian account (Auth-Cust-Acct-No) and sub-installation (Auth-Inst-No).

- There are any PCM Pending records that were submitted by this custodian account (matching Pend-Cust-Acct-No on the Pending record and inst-sub on the Equipment record).

- There are any PCM Pending records for which the custodian account is the gaining custodian (Matching Pend-To-Cust-Acct-No on the Pending record and inst-sub on the Equipment record)

In each case, error message 107 is displayed, along with a prompt to cancel.

CUSTODIAN INSTALLATION SUB-ACCOUNT:

a. Mandatory

b. The user's installation sub-account is provided as the default for custodian installation sub-account.

c. If the user is authorized, any valid installation sub-account may be entered in place of the default installation sub-account (must be on Table 252).

Cancel:

a. Optional

Must be either 'C' or space.

6.1.3 NEMS - 078 - Custodian Account Number Table, Screen #2

```
USER-ID: XXXXX                                                  DATE: MM/DD/YY
PROGRAM: TBL078P1   NEMS – 078 – CUSTODIAN ACCOUNT NUMBER TABLE   TIME: HH:MM:SS

ENTER FUNCTION (A=ADD, C=CHANGE, D=DELETE, X=EXIT): _____

CUSTODIAN ACCOUNT NUMBER: _____

CUSTODIAN INSTALLATION SUB-ACCOUNT: 08

CUSTODIAN NUMBER:  _____
CUSTODIAN NAME: _____
CUSTODIAN MAIL CODE: _____
CUSTODIAN ORGANIZATION CODE:  _____
CUSTODIAN ACCOUNT NAME:  _____
CUSTODIAN PHONE NUMBER:  _____

                    ENTER 'C' TO CANCEL:  __
```

Purpose:

    This screen is the second of two screens used to add, change or delete records for Table 078. This screen is used to enter data relative to a specific table record.

Called From Screen:

    This screen is called by the first NEMS - 078 - Custodian Account Number Table screen.

Calls Screen:

    Upon completion, this screen calls the first NEMS - 078 - Custodian Account Number Table screen.

Instruction Steps:

  Step 1: A screen with the previously entered function, custodian account number and custodian installation sub-account will be displayed. These fields are protected. For add type updates, blank fields will be provided to enter the required data element information. For change and delete type updates, current data for the selected record will be displayed. Enter the desired information.

           Press the 'ENTER' key.

Step 2: If error messages appear at the bottom of the screen, read the messages and correct the identified field.

Press the 'ENTER' key.

Step 3: The user may cancel the function at any time prior to successful completion by entering 'C' in the cancel field. This will return the user to the first NEMS - 078 - Custodian Account Number Table screen.

Press the 'ENTER' key.

Edit Criteria:

Custodian Number:

    a. Mandatory

    b. No further edits

Custodian Name:

    a. Mandatory

    b. No further edits

Custodian Mail Code:

    a. Mandatory

    b. No further edits

Custodian Organization Code:

    a. Mandatory

    b. No further edits

Custodian Account Name:

    a. Optional

    b. No further edits

Cancel Field:

    Must be 'C' or blank

6.1.4 NEMS - 090 - User Number Table, Screen #1

```
USER-ID: XXXXX                                              DATE: MM/DD/YY
PROGRAM: TBL090P1        NEMS - 090 - USER NUMBER TABLE     TIME: HH:MM:SS

ENTER FUNCTION (A=ADD, C=CHANGE, D=DELETE, X=EXIT): _____

USER NUMBER: _____

USER INSTALLATION SUB-ACCOUNT: 08
```

Purpose:

> This screen is the first of two screens used to add, change or delete records
> on NEMS Table 090. This screen captures the information necessary to
> either find the record, or, in the case of an add, ensure it will be unique.
> Once this is done, a second screen is called for input of required information.

Called From Screen:

> The NEMS Table File Update menu calls this screen.

Calls Screen:

> a. This screen calls the second data collection screen for Table 090.
>
> b. Upon completion, this screen calls the NEMS Table File Update menu.

Instruction Steps:

> Step 1: A screen is displayed with areas for entering the function, user
> number and user installation sub-account. Enter the desired
> information. To return to the NEMS Table File Update menu, enter
> 'X' in the function field.
>
> Press the 'ENTER' key.
>
> Step 2: If error messages appear at the bottom of the screen, read the
> messages and correct the identified field.

Press the 'ENTER' key.

Edit Criteria:

Function:

   a. Mandatory

   b. Must be 'A', 'C', 'D' or 'X'

User Number:

   a. Mandatory

   b. For add updates, a record must not exist on Table 090 with the same user number and installation sub-account. (See below)

   c. For change and delete updates, a record must exist on Table 090 with the same user number and installation sub-account. (See below)

User Installation Sub-Account:

   a. Mandatory

   b. The user's installation sub-account is provided as the default for user installation sub-account.

   c. If the user is authorized, any valid installation sub-account may be entered in place of the default installation sub-account (must be on Table 252).

6.1.5 <u>NEMS - 090 - User Number Table, Screen #2</u>

```
USER-ID: XXXXX                                              DATE: MM/DD/YY
PROGRAM: TBL090P1         NEMS - 090 - USER NUMBER TABLE    TIME: HH:MM:SS

ENTER FUNCTION (A=ADD, C=CHANGE, D=DELETE, X=EXIT): _____

USER NUMBER: _____

USER INSTALLATION SUB-ACCOUNT: 08

USER NAME: _____
USER MAIL CODE: _____
USER PHONE NUMBER:  _____

                      ENTER 'C' TO CANCEL:  __
```

Purpose:

This screen is the second of two screens used to add, change or delete
records for Table 090. This screen is used to enter data relative to a specific
table record.

Called From Screen:

The first NEMS 090 User Number Table screen calls this screen.

Calls Screen:

Upon completion, this screen calls the first NEMS 090 User Number Table
screen.

Instruction Steps:

Step 1: A screen with the previously entered function, user number and user
installation sub-account will be displayed. These fields are protected.
For add type updates, blank fields will be provided to enter the
required data element information. For change and delete type
updates, current data for the selected record will be displayed. Enter
the desired information.

Press the 'ENTER' key.

Step 2: If error messages appear at the bottom of the screen, read the
messages and correct the identified field.

Press the 'ENTER' key.

Step 3: The user may cancel the function at any time prior to successful completion by entering 'C' in the cancel field. This will return the user to the first NEMS - 090 - User Number Table screen.

Press the 'ENTER' key.

Edit Criteria:

User Name:

a. Mandatory

b. No further edits

Cancel Field:

Must be 'C' or blank

6.1.6 NEMS - 102 - Building Number Table, Screen #1

```
USER-ID: XXXXX                                              DATE: MM/DD/YY
PROGRAM: TBL102P1      NEMS - 102 - BUILDING NUMBER TABLE   TIME: HH:MM:SS

ENTER FUNCTION (A=ADD, C=CHANGE, D=DELETE, X=EXIT): _____

BUILDING NUMBER: _____
```

Purpose:

This screen is the first of two screens used to add, change or delete records on NEMS Table 102. This screen captures the information necessary to either find the record, or, in the case of an add, ensure it will be unique. Once this is done, a second screen is called for input of required information.

Called From Screen:

The NEMS Table File Update menu calls this screen.

Calls Screen:

a. This screen calls the second data collection screen for Table 102.

b. Upon completion, this screen calls the NEMS Table File Update menu.

Instruction Steps:

Step 1: A screen is displayed with areas for entering the function and building number. Enter the desired information. To return to the NEMS Table File Update menu, enter 'X' in the function field.

Press the 'ENTER' key.

Step 2: If error messages appear at the bottom of the screen, read the messages and correct the identified field.

Press the 'ENTER' key.

Edit Criteria:

Function:

a. Mandatory

b. Must be 'A', 'C', 'D' or 'X'

Building Number:

a. Mandatory

b. For add updates, this record must not exist on Table 102

c. For change and delete updates, this record must exist on Table 102

6.1.7 NEMS - 102 - Building Number Table, Screen #2

```
USER-ID: XXXXX                                                DATE: MM/DD/YY
